Aprašymas

The Lanberg FF01 series of rack cabinets is an excellent, well-thought-out solution for professional ICT environments where safe storage and management of a large amount of server equipment is necessary. The rack cabinet's design allows for efficient use of space, and its robust construction ensures durability and long-lasting use. FF01 server racks are available in a variety of sizes and configurations for a perfect fit to individual user needs.
Thanks to high-quality materials and precise design solutions, the FF01 series guarantees optimal working conditions for server equipment and ease of access and management of ICT infrastructure. In addition, the aesthetic design and the ability to personalize add-ons and mounting components make Lanberg FF01 server cabinets an ideal choice for both large enterprises and smaller companies that are looking for a reliable and functional solution for their IT infrastructure.

Easy installation

Thanks to the thoughtful design and ease of installation of our FF01 series of standing server racks, you save valuable time and effort by focusing on your key tasks. Regardless of your level of experience, you can quickly and efficiently organize your data center or server network.
Our racks not only come with clear paper installation instructions, but we also provide detailed video instructions available online. These step-by-step guide you through the entire process, ensuring that you fully understand each step.
All of our FF01 standing server cabinets are equipped with grounding, providing additional protection for your equipment. This ensures the safe use of your equipment, protecting it from potential damage caused by electrical discharges.

Solid workmanship

Standing for reliability and robustness, Lanberg FF01 series standing server racks are a guarantee of excellent quality. Designed with attention to every detail, our rack cabinets are distinguished by exceptional durability and precision workmanship, regardless of the application.
High-quality cold-rolled steel, from which the elements of our data communication cabinets are made, ensures not only durability, but also precision and solidity of construction.
Each of our FF01 series server cabinets is characterized by exceptional solidity of workmanship, which is the result of an advanced manufacturing process , providing excellent results both aesthetically and functionally.

Flat Pack

Our Lanberg server racks are packaged in "Flat Pack" self-assembly format. As a result, you can easily transport our racks in vehicles with limited cargo space, as well as have full control over the assembly process.
Our years of experience in the market have given us an excellent understanding of how to protect components in cardboard boxes to minimize the risk of damage during transportation. We use high-quality protective materials and careful packaging to ensure that your server racks arrive to you in perfect condition – immediately ready for installation.

Efficient cooling

Standing server racks in the FF01 series from Lanberg are the ideal solution for those looking for performance even in the most demanding temperature conditions. Our racks combine optimal performance with functionality, aesthetics and security.
By incorporating a vent at the top of the design, each of our racks provides excellent airflow, resulting in effective cooling. This element, combined with the built-in fans, guarantees temperature control inside the cabinet, which is crucial for maintaining optimal operating conditions for your equipment.
The design of our FF01 server cabinets has been thought out to ensure the highest cooling efficiency. This translates into long-lasting and trouble-free operation of your equipment, no matter what its requirements are.
The design of our server cabinets has been thoughtfully designed to ensure the best possible performance.

Techninė specifikacija
