## Aprašymas

### New generation of Lanberg patch panels

Lanberg patch panel for 19" racks is a solution designed for professional network cabling. With 24 RJ-45 category 5E UTP ports and T568A/B-compliant IDC/LSA universal connectors, it will work well in a variety of environments - from small server rooms to complex data centers. An additional integrated shelf and metal cable holders allow for convenient and quick cable organization, which translates into order in the RACK cabinet and easy cable management. All ports have been clearly numbered for easy identification of individual lines, and dedicated description spaces help make network management even more intuitive.

### Improved solutions for professionals

One of the most significant advantages of the new patch panel is its extensive set of accessories - the set includes M6 cable ties and mounting screws, which translates into quick and hassle-free installation. Built-in cable clamps provide a solid mounting of cables, so even under heavy load you are sure to maintain order and stability in the cabinet. This is an indispensable solution for network system integrators, IT installers and

electricians, as well as network administrators in corporations or telecommunications companies. Lanberg patch panel is an investment in durable, efficient and professional cabling that will meet the expectations of even the most demanding users.

## Techninė specifikacija
