Aprašymas

FREEWELL Mega Kit Filter Set for Insta360 Luna Pro (12 pcs.)

The FREEWELL Mega Kit Filter Set for Insta360 Luna Pro is a set of 12 filters that allow you to adjust your video and photo settings to suit various lighting conditions. The set includes ND8, ND16, ND32, and ND64 filters, their ND/PL equivalents, as well as ND1000, CPL, Glow Mist 1/4, and LPR filters. With these filters, you can control the amount of light reaching the lens, reduce glare, create stunning long-exposure shots, and give your footage a more cinematic look. This is a practical solution for creators who shoot both in direct sunlight and after dark.

Light Control in Various Conditions

The ND8, ND16, ND32, and ND64 reduce the amount of light entering the lens, making it easier to achieve proper exposure when filming in bright environments. They also allow for longer exposure times, making motion in your footage appear more natural. The set also includes four ND/PL filters, which combine light reduction with glare reduction. They’re ideal for filming near water, glass surfaces, or other light-reflecting objects.

More Creative Shooting Options

The ND1000 filter allows for significantly longer exposure times, enabling you to capture the effect of blurred, flowing water or emphasize the movement of clouds in your photos. The CPL filter helps reduce unwanted reflections and improve color saturation, especially when photographing landscapes. The Glow Mist 1/4, on the other hand, gently diffuses light, softens highlights, and gives your footage a subtle, cinematic look.

Better shots even after dark

The kit also includes an LPR filter, designed to reduce the impact of certain types of artificial lighting on nighttime photos and videos. It helps reduce unwanted color casts caused by light pollution, which is useful when photographing the night sky and landscapes after dark. Thanks to the wide selection of filters in the FREEWELL Mega Kit, you can experiment more freely with your images and choose the right effect for the current conditions.
