Aprašymas

FREEWELL ND Filter Set for Insta360 X6 ND16/32/64

The Freewell ND filter set for the Insta360 X6 is a practical solution for those who want greater control over exposure when recording on sunny days. The set includes three filters with different levels of darkness: ND16, ND32, and ND64, which allow you to adjust the amount of light reaching the lens to suit the prevailing lighting conditions. This allows you to use appropriately selected exposure times, resulting in smoother, more natural-looking footage. The kit is designed specifically for the Insta360 X6 camera and is ideal for travel, recording sports activities, and outdoor filming.

Three filters for different lighting conditions

The set includes ND16, ND32, and ND64 filters, which reduce the amount of light entering the lens by 4, 5, and 6 f-stops, respectively. The ND16 is ideal for shooting in bright daylight, the ND32 for intense sunlight, and the ND64 helps reduce excess light in particularly sunny conditions. This makes it easier to adjust your camera settings to match your surroundings.

Smoother and More Natural Footage

ND filters allow you to use longer exposure times even in strong sunlight. This creates a natural motion blur that gives your footage a more cinematic look. This is especially useful when capturing dynamic scenes, such as cycling, running, or shooting on the move.

Included

- ND16 filter
- ND32 filter
- ND64 filter

Manufacturer	Freewell
