Pagrindinės savybės

- ✓ Endpoint detection & response
- ✓ Software type: License
- ✓ License type: Education (EDU)
- ✓ 1 license(s)
- ✓ 4 year(s)

Aprašymas

Absolute Secure Endpoint

Make your endpoints reliable and resilient for the modern workforce by leveraging the always-on connection provided by Absolute Persistence technology.

Make endpoints resilient

Detect and identify all assets on USB interfaces and component level visibility (Hardware BOM) for supply chain verification.

Protect at-risk devices

Instantly detect hardware-based attack tools that evade existing security solutions.

Always-on device connectivity

Pateikta prekės informacija yra orientacinio pobūdžio. Techninės savybės, nuotraukos, aprašymai ir kaina gali keistis be išankstinio perspėjimo. Gamintojas ir pardavėjas neatsako už galimus duomenų neatitikimus ar tipografines klaidas. Prieš įsigyjant rekomenduojame pasitikrinti aktualią informaciją.

Establish trust and enforce hardware usage with granular risk-based access controls for continuous device verification.

Strengthen mission-critical apps

Utilize Absolute Application Resilience™ to automatically repair or reinstall mission-critical applications supported in the associated catalog to protect against common decay, software collision, unintentional deletion or malicious actions. Ensure the most used security controls and critical recovery tools, such as anti-malware, endpoint protection and unified endpoint management, work as intended.

Safeguard your devices

Retain control over all your endpoints to alleviate risks before they become serious incidents. Take swift remedial action across at-risk endpoints using Absolute’s critical control functions, such as remote file deletion and data wipe, freezing devices on demand when at-risk, end- user messaging and establishing geofences and alerts.

Enhanced endpoint visibility

Always have a direct line of sight to your endpoints, regardless of whether they are on or off the corporate network. Access a wide range of granular device data points such as hardware inventory details, installed software, device usage metrics, security vitals, geolocation, sensitive data discovery and Web app usage. Monitor historical dashboards to identify and respond to anomalies.

What is Absolute Control?

Absolute Control is the mid-service tier in the Absolute Secure Endpoint portfolio. Absolute Control adds to Absolute Visibility’s capabilities to control endpoints over the Internet, allowing for critical functions such as remote file deletion and data wipe, freezing devices on demand when at-risk, end user messaging, as well as establishing geo-fences and alerts.

Techninė specifikacija

License	
Type	Endpoint detection & response
Software type	License
License type	Education (EDU)
License quantity	1 license(s)
License term in years	4 year(s)
License level purchase required	5000 - 9999 license(s)
Matmenys ir svoris	
Svoris	1,00kg
