well as for a small or medium-sized company. The series is distinguished by its depth adjustment feature, allowing the installation of a wide variety of hardware configurations.

Thanks to the use of high-quality materials and design innovations, the Open Rack series guarantees optimal working conditions for server equipment and easy access and management of ICT infrastructure. In addition, the aesthetically pleasing design and the ability to customize add-ons and mounting components make Lanberg's Open Rack an ideal choice for large enterprises, as well as smaller businesses and hobbyists looking for a reliable and functional solution for their IT infrastructure.

Easy and convenient self-assembly

Thanks to the clever design and simplicity of installation of our Open Rack Series server racks, you will save yourself unnecessary effort and frustration. Noteworthy in this series are the welded nuts to the frame, making it much easier to screw in the screws using one hand.

Lanberg's Open Rack comes with clear paper installation instructions. These step-by-step guide you through the entire process, ensuring that you fully understand each step. Regardless of your level of experience, you can quickly and efficiently organize your data center or server network.

Adjustable mounting depth

With an adjustable mounting depth from 576.40 mm to 1,033.60 mm, these cabinets are extremely versatile and allow the installation of a wide variety of equipment. Unfolding the rack is very simple and only requires tightening the screws at the selected optimal position.

Durable, well-thought-out design

Lanberg Open Rack data communication racks are synonymous with reliability and robustness. Made of high-quality cold-rolled steel, they ensure durability and precision. You will also find a set of casters with brakes, which allows you to easily move the rack with mounted equipment. This is the ideal solution for those who need a flexible and mobile storage system for IT equipment.

Shipping in a handy Flat Pack

Lanberg server racks are packaged in Flat Pack format for self-assembly. This allows you to easily transport our RACK cabinets in vehicles with limited cargo space, as well as have full control over the assembly process.

Years of experience in the market have given us a great understanding of how to protect components in cartons to minimize the risk of damage during transport. We use high-quality protective materials and careful packaging to ensure that your server racks arrive in perfect condition - ready for assembly right away.

Payload capacity up to 600 kg

Open Rack Lanberg is a robust rack designed for professionals who need a reliable solution for storing equipment. Our rack features a load capacity of 600 kg, allowing users to store even the heaviest equipment.

With reinforced vertical rails and equipped with sturdy feet, Lanberg's Open Rack not only provides unparalleled load capacity, but also stability and security for stored equipment. In addition, the base of the frame has been reinforced, which emphasizes the durability and reliability of this product. Lanberg Open Rack is the ideal solution for anyone who needs assurance that their equipment will be stored safely and efficiently.

Techninė specifikacija

Features	
Rack capacity	15U
Type	Freestanding rack
