## Aprašymas

This compact keyboard has all the ergonomic features for healthy typing. The compact design ensures that your hands always remain within shoulder width when using keyboard and mouse simultaneously. The light keystroke reduces muscle tension while typing. The keyboard is ultra thin, so your hands and wrists are in a relaxed, natural position while typing. This ensures better blood flow to your hands. The R-Go Compact Break keyboard indicates with LED colour signals when it is time to take a break. As you type, the light changes colour, like a traffic light. When the light turns green, it means you are working healthily. Orange indicates it is time for a short break and red that you have been working too long. Taking short breaks during your working day will increase your concentration, prevent strain injuries and keep you fit during your working day. This product works together with the R-Go Break Software that won the Benelux Office Products Award 2021.
