Aprašymas

TELESIN 170 cm Projection Tripod and Selfie Stick

Create unique photos and videos. The multifunctional TELESIN tripod, with a maximum length of 170 cm, combines the functions of a selfie stick, a stable tripod, and a remote viewfinder. Thanks to the Bluetooth remote control with a built-in monitor, you can keep an eye on the frame in real time, even when using your smartphone’s rear camera. 720° adjustment, an automatically unfolding base, and remote control from up to 10 m away ensure freedom while shooting. The lightweight aluminum alloy construction makes it easy to transport, and the universal mount allows you to use a variety of phone models.

Perfect Framing with Live Preview

The remote control, equipped with a monitor, lets you view the image from your smartphone’s camera in real time, so you can precisely frame your shot, adjust your pose, and ensure every detail of the photo is just right. This is especially useful when taking selfies with your phone’s rear camera, when you can’t see the screen. The preview feature also comes in handy for group photos—you can easily join your friends and make sure everyone fits in the frame.

More possibilities thanks to an adjustable length of up to 170 cm

Capture every moment from the best angle! TELESIN’s telescoping design allows you to extend the pole up to 170 cm, making it easier to take photos from a greater distance and capture wide-angle shots. The 720° adjustment system includes 360° rotation and 180° tilt, giving you complete

Pateikta prekės informacija yra orientacinio pobūdžio. Techninės savybės, nuotraukos, aprašymai ir kaina gali keistis be išankstinio perspėjimo. freedom to position your phone. This lets you comfortably take vertical and horizontal photos, shoot from above, from the side, or from a very low angle. You can easily adjust your smartphone’s position to suit the scene, whether you’re recording video, taking a selfie, or capturing your surroundings.

Automatically folding tripod and convenient transport

Setting up the tripod doesn’t have to be a time-consuming process. TELESIN uses HelixCore Tech™, which allows the base legs to automatically unfold when the tripod is placed on the ground and fold back up when lifted. The springless mechanism makes the accessory easy to use on a daily basis, while the low center of gravity, a base span of 46 × 46 cm, and non-slip feet ensure stable support for your phone. Additionally, the integrated folding system allows you to stow the smartphone holder and tripod legs inside the frame. This makes the accessory more compact, and the protruding parts won’t snag on other items in your luggage. When folded, the tripod is only 35 cm long, making it easy to store and transport.

Remote control from up to 10 meters away

Gain more control over your photography without having to touch your phone! The multifunctional Bluetooth remote control allows you to take photos remotely and supports control from a distance of up to 10 m. It features shutter buttons on the front and side, zoom control, and a camera mode switch. A short press of the corresponding button flips the image horizontally, while holding it down longer rotates the image horizontally. The remote also allows you to turn the power on and off, and its compatibility with iOS, Android, and HarmonyOS ensures a wide range of applications.

Universal Mount and Additional Accessories

Use your favorite smartphone and expand your recording setup! The adjustable mount, with a clamping width of 40 to 90 mm, accommodates various phones, including iPhone Mini, iPhone Max, and Android devices. The tripod is also equipped with a cold shoe mount, which allows you to attach additional accessories, such as lighting or a microphone. This makes it easier to set up your shooting station for photos and videos.

Included in the set

- Selfie stick
- Remote control
- Wrist strap
- Magnetic ring
- USB-C charging cable
- User manual

Manufacturer	TELESIN
Model	P1-CSS-02
