Aprašymas

MOES CCP-S01-EU-WH-MS Touch Control Panel, WiFi

Manage your smart home conveniently from one place! The MOES CCP-S01-EU-WH-MS is equipped with a 3.5-inch screen with a resolution of 320 × 480 pixels, three independent relays, and three physical buttons that provide quick access to the most important functions. The device allows you to control up to 200 smart home devices, and thanks to its built-in Bluetooth SIG Mesh gateway, it supports up to 128 slave devices without the need for an additional hub. The panel works with Wi-Fi, the MOES and Smart Life apps, and the Amazon Alexa and Google Assistant voice assistants. It also offers alarm functions, live video feeds from IP cameras, and support for video doorbell calls, making it a practical home management hub.

Your Entire Home Under Control

Control devices in individual rooms or manage your entire home using a single panel. The MOES CCP-S01-EU-WH-MS supports up to 200 devices, providing convenient access to smart lighting, blinds, and temperature control. On the screen, you can, among other things, adjust the brightness and color of the lights, control the air conditioning, and operate the curtains. Smart home scenes are also available to make it easier to use your favorite settings. This way, you don’t have to control each device separately—the most important functions are always at your fingertips.

Built-in Bluetooth SIG Mesh Gateway

Expand your smart home without having to install an additional gateway! The MOES panel features a built-in Bluetooth SIG Mesh hub that allows you to connect up to 128 compatible slave devices. With it, you can integrate smart switches, control modules, and other accessories that support this

technology. This solution reduces the number of devices needed and makes it easier to create an extensive home automation system. The panel also supports three independent relays, offering additional control options for connected circuits.

Convenient Day-to-Day Use

The 3.5-inch touchscreen provides clear access to smart home functions and settings. The panel offers various interface themes, allowing you to customize its appearance to your preferences. It also lets you transfer photos from your phone and set them as wallpaper or a screensaver. An added convenience is the three physical buttons, which let you quickly launch assigned functions without having to use the touchscreen interface. A screen unlock feature is also available.

Greater Security for Your Home

The MOES CCP-S01-EU-WH-MS helps ensure the safety of your household members and allows you to respond quickly to potential threats. The panel can work with smoke, gas, and flood sensors, as well as SOS buttons. If a hazard is detected, it automatically triggers an alarm and displays a corresponding message on the screen. This allows you to quickly learn about an alarming situation, such as a detected water leak. It’s a practical addition to your smart home security system.

Camera View and Video Doorbell Support

Gain access to additional home monitoring features directly from the control panel. The device supports video streaming from IP cameras, allowing you to view footage from a compatible camera on its screen. There’s also a feature for answering video doorbell calls, which makes it easier to respond to visitors. By combining these capabilities with the alarm system, the control panel helps you not only manage smart devices but also monitor what’s happening at home.

Voice Control and Mobile Apps

You don’t have to walk over to the control panel every time you want to use your smart home features. The MOES CCP-S01-EU-WH-MS works with Amazon Alexa and Google Assistant, enabling voice control via compatible devices. It also supports the MOES and Smart Life apps as well as the Tuya ecosystem, providing additional options for managing your smart home system. Thanks to Wi-Fi connectivity, the panel can be conveniently integrated with compatible smart home solutions.

Three Relays and a Compact Design

The panel combines extensive functionality with a compact size. Its housing measures 86 × 86 × 35.5 mm including the base, so the device doesn’t take up much space on the wall. Three independent relays support a maximum load of 200 W per channel, with a total load of up to 600 W. The device is designed for a 100–240 V AC power supply and operates at temperatures ranging from 0°C to 40°C.

Included in the package

- MOES Smart Control Panel Mini x1
- Screws x4
- Reset pin x1
- User manual x1

Manufacturer	MOES
Model	CCP-S01-EU-WH-MS
