Aprašymas

Lanberg’s VGA 1.8m cable with double shielding and ferrite core is a premium grade wire ideally suited for all kinds of connections between multimedia devices using VGA analogue connectors. The product main use is for connections between PCs / laptops and monitors, TVs and projectors.

Due to the use of the ferrite core, the signal transmitted via the cable is kept in a larger percentage according to the original signal at the input. The shielding used in the cable additionally strengthens the level of insulation, thanks to which the signal is not significantly degraded and can be sent over longer distances.

As a result of many restrictions, requirements and the emphasis focused on multi-stage manufacturing and quality control of cable production,
