Pagrindinės savybės

- ✓ Saugumo valdymas
- ✓ Programos tipas: Licencija
- ✓ 1 licenc.
- ✓ 2 metai

Aprašymas

Absolute Secure Endpoint

Make your endpoints reliable and resilient for the modern workforce by leveraging the always-on connection provided by Absolute Persistence technology.

Make endpoints resilient

Detect and identify all assets on USB interfaces and component level visibility (Hardware BOM) for supply chain verification.

Protect at-risk devices

Instantly detect hardware-based attack tools that evade existing security solutions.

Always-on device connectivity

Establish trust and enforce hardware usage with granular risk-based access controls for continuous device verification.

Pateikta prekės informacija yra orientacinio pobūdžio. Techninės savybės, nuotraukos, aprašymai ir kaina gali keistis be išankstinio perspėjimo. Gamintojas ir pardavėjas neatsako už galimus duomenų neatitikimus ar tipografines klaidas. Prieš įsigyjant rekomenduojame pasitikrinti aktualią informaciją.

Strengthen mission-critical apps

Utilize Absolute Application Resilience™ to automatically repair or reinstall mission-critical applications supported in the associated catalog to protect against common decay, software collision, unintentional deletion or malicious actions. Ensure the most used security controls and critical recovery tools, such as anti-malware, endpoint protection and unified endpoint management, work as intended.

Safeguard your devices

Retain control over all your endpoints to alleviate risks before they become serious incidents. Take swift remedial action across at-risk endpoints using Absolute's critical control functions, such as remote file deletion and data wipe, freezing devices on demand when at-risk, end- user messaging and establishing geofences and alerts.

Enhanced endpoint visibility

Always have a direct line of sight to your endpoints, regardless of whether they are on or off the corporate network. Access a wide range of granular device data points such as hardware inventory details, installed software, device usage metrics, security vitals, geolocation, sensitive data discovery and Web app usage. Monitor historical dashboards to identify and respond to anomalies.

What is Absolute Resilience?

Absolute Resilience is the top service tier in the Absolute Secure Endpoint product portfolio and the most popular package among customers. Compared to Absolute Control, it adds further capabilities to secure endpoints from threats and vulnerabilities, respond to security breaches and incidents, and enable Application Resilience to automatically monitor and detect unhealthy applications and automatically heal them.

Techninė specifikacija

Licenzija	
Tipas	Saugumo valdymas
Programos tipas	Licencija
Licencijos kiekis	1 licenc.
Licencijos galiojimo trukmė	2 metai
Reikalingas licencijos lygio pirkimas	100000+ licenc.
Matmenys ir svoris	
Svoris	1,00kg
