Pagrindinės savybės

- ✓ Galinio įrenginio aptikimas ir reagavimas
- ✓ Programos tipas: Licencija
- ✓ 1 licenc.
- ✓ 1 metai

Aprašymas

Absolute Secure Endpoint

Make your endpoints reliable and resilient for the modern workforce by leveraging the always-on connection provided by Absolute Persistence technology.

Make endpoints resilient

Detect and identify all assets on USB interfaces and component level visibility (Hardware BOM) for supply chain verification.

Protect at-risk devices

Instantly detect hardware-based attack tools that evade existing security solutions.

Always-on device connectivity

Establish trust and enforce hardware usage with granular risk-based access controls for continuous device verification.

Pateikta prekės informacija yra orientacinio pobūdžio. Techninės savybės, nuotraukos, aprašymai ir kaina gali keistis be išankstinio perspėjimo. Gamintojas ir pardavėjas neatsako už galimus duomenų neatitikimus ar tipografines klaidas. Prieš įsigyjant rekomenduojame pasitikrinti aktualią informaciją.

Strengthen mission-critical apps

Utilize Absolute Application Resilience™ to automatically repair or reinstall mission-critical applications supported in the associated catalog to protect against common decay, software collision, unintentional deletion or malicious actions. Ensure the most used security controls and critical recovery tools, such as anti-malware, endpoint protection and unified endpoint management, work as intended.

Safeguard your devices

Retain control over all your endpoints to alleviate risks before they become serious incidents. Take swift remedial action across at-risk endpoints using Absolute’s critical control functions, such as remote file deletion and data wipe, freezing devices on demand when at-risk, end- user messaging and establishing geofences and alerts.

Enhanced endpoint visibility

Always have a direct line of sight to your endpoints, regardless of whether they are on or off the corporate network. Access a wide range of granular device data points such as hardware inventory details, installed software, device usage metrics, security vitals, geolocation, sensitive data discovery and Web app usage. Monitor historical dashboards to identify and respond to anomalies.

What is Absolute Visibility?

Absolute Visibility is the entry service tier in the Absolute Secure Endpoint portfolio. Absolute Visibility collects data about the endpoints' location, security posture, and hardware/software inventory. It provides analysis of software, Web applications, and hardware utilization as well as identifies potential failure points, sensitive data, and suspicious use patterns.

Techninė specifikacija

Licenzija	
Tipas	Galinio įrenginio aptikimas ir reagavimas
Programos tipas	Licencija
Licencijos kiekis	1 licenc.
Licencijos galiojimo trukmė	1 metai
Reikalingas licencijos lygio pirkimas	10000 - 24999 licenc.
Matmenys ir svoris	
Svoris	1,00kg
