Pagrindinės savybės

- ✓ Available capacities: 8 GB 16 GB 32 GB
- ✓ Available colors:green, red
- ✓ DIMM form factor
- ✓ Fast DDR4 technology
- ✓ Capacities up to 64 GB (dual channel)
- ✓ Frequency up to 3200 MHz
- ✓ Lifetime warranty + technical support

Aprašymas

Goodram RIVAL DDR4 RADIANT – memory that keeps pace with your setup

A single stutter, drop in smoothness or delayed system response can take you out of the game faster than a lost round. Goodram RIVAL DDR4 RADIANT is RAM memory for gamers who want to get more out of their PC and reduce hardware limitations during gaming, streaming and everyday multitasking.

The modules operate at 3200 MHz and are available in CL16 and CL18 latency variants. The series includes 4, 8, 16 and 32 GB capacities, while dual-channel configurations allow you to build a setup with up to 64 GB of memory. The modules operate at 1.2 V or 1.35 V, depending on the

variant.

In practice, this means more memory headroom for your game, communicator, browser, streaming applications and background processes.

Goodram RIVAL – a gaming brand in the Goodram portfolio

Goodram RIVAL was created for gamers, PC enthusiasts and users who expect stability, speed and predictable performance under load from their hardware.

Goodram RIVAL DDR4 RADIANT brings this philosophy to desktop computers based on the DDR4 standard. It is a solution for users who are not planning to replace their entire platform, but want to improve PC comfort where the difference can still be felt – in multitasking, system responsiveness and stability during longer sessions.

Upgrade without replacing the entire computer

Not every gamer needs a new motherboard, processor and DDR5 memory right away. If your DDR4-based computer still performs well in games, expanding RAM can be a sensible next step.

Goodram RIVAL DDR4 RADIANT is a good choice when you want to play games, chat on a communicator, keep your browser open, use launchers and run background applications without constantly feeling that the system is running out of breath.

It is not a solution for users building the latest setup from scratch. It is memory for those who want to reasonably extend the life of their current DDR4 platform.

Stability and compatibility

Goodram RIVAL DDR4 RADIANT are DDR4 UDIMM modules built with selected memory chips. They were designed for stable operation in popular PC configurations – both in everyday use and during longer gaming sessions.

For gamers, this means less time spent troubleshooting and more time focused on the game itself. Hardware should perform predictably, especially when the computer is working under heavier load.

RADIANT Green and RADIANT Red – a color that matches your setup

Goodram RIVAL DDR4 RADIANT is available in two color variants: Green and Red. Both versions feature a black PCB and a heatsink matched to the product variant.

Green adds a strong, fresh accent to the configuration. Red highlights a more aggressive, gaming character of the setup. You choose the color that matches your build – without changing the key parameters.

Techninė specifikacija

Savybės	
Vidinė atmintis	8 GB
Atminties išdėstymas (moduliai x dydis)	1 x 8 GB
Vidinės atminties tipas	DDR4
Atminties duomenų perkėlimo greitis	3200 MT/s
Taikoma	PC
Atminties formos koeficientas	288-pin DIMM
ECC	Ne
Matmenys ir svoris
