Aprašymas

1-Inch Flagship Imaging, 8K/60fps HDR Video
1-inch-equivalent sensors, large 2.4 µm pixels, and high dynamic range deliver exquisite clarity. 8K/60fps HDR 360° video provides sufficient resolution for sharp cropped shots.

Powerful Video Transmission, Immersive Flight
DJI O4+ video transmission system features strong anti-interference capabilities, delivers high-definition, high-frame-rate transmission at 1080p/60fps, and supports a range of up to 20 km.

Infinite Creativity From One Take
Capture a full 360° view in a single flight. In post, reframe from any perspective to turn one clip into multiple creations.

Unlimited Rotation, Unbound Vision
360° imaging enables infinite rotation and tilt control. Even when flying in one direction, you can effortlessly rotate the horizons, make the view do a flip, or create the dolly zoom effect.

Omnidirectional Obstacle Sensing & Propeller Guard
Nightscape omnidirectional obstacle sensing works even during action tracking. The integrated propeller guard provides an extra layer of safety.
