Aprašymas

The Robotic Vacuum Cleaner Engineered for Perpetual Cleaning Power

Simple by Design. Powerful in Action

OZMO ROLLER 3.0
OZMO ROLLER 3.0 Instant Self-Washing Mopping — now 50% longer at 27 cm, the mop offers wider, more efficient coverage. Powered by a high-performance air pump, its pressurized self-washing system releases energetic water pulses through 32-way pressurized nozzles —thoroughly loosening and flushing away stubborn dirt from the roller. During operation, the mop spins at up to 200 RPM to maintain consistent cleanliness and prevent streaks or secondary contamination. Combined with strong downward pressure and a high-density nylon roller, it delivers a deep, even clean that dries quickly—keeping your floors spotless with zero effort.

BLAST into Clean
The upgraded BLAST Solution redefines the meaning of truly powerful and efficient cleaning. Driven by a high-torque motor, it features larger fan blades in a low-resistance structure. Powered by an EV-Grade Pouch Battery with 1.6 times battery lifespan, it unleashes an unprecedented 16L/s airflow, and up to 30000Pa suction power. 100% pickup rate for large debris on both hard floors and carpets.

TruEdge 3.0
The upgraded TruEdge 3.0 Extreme Edge Cleaning technology features an air-cushion suspended roller with an extended 1.5cm reach. The outermost edge of the roller is protected by a soft felt strip, allowing DEEBOT to glide along baseboards like a whisper while safeguarding your

Pateikta prekės informacija yra orientacinio pobūdžio. Techninės savybės, nuotraukos, aprašymai ir kaina gali keistis be išankstinio perspėjimo. furniture from scratches. The variable cushion system adapts in real-time to guarantee wall-to-wall perfection. Air felt continuously hug walls, while the fixed side brush captures edge debris—achieving maximum cleaning coverage with zero user effort needed.

ZeroTangle 4.0

The all-new Airflow-Directed Anti-Tangle Main Brush redefines cleaning with its Airflow-Directed Anti-Tangle System, featuring exclusive lateral airflow channels that work together to efficiently draw in dust and capture every strand of hair—smoothly and completely tangle-free.Supported by a reinforced, wide-span dual-bearing structure, it delivers stable, quiet, yet powerful scrubbing performance for a cleaner, more effortless experience.

All-Dimensional Noise Reduction

Through comprehensive redesigns and optimizations to the main brush, fan, and air-duct structure, DEEBOT achieves a remarkable reduction in operating noise—by up to 3 dBA during dust collection and 5 dBA during suction. This corresponds to a reduction in noise intensity of approximately 50% and 68%, respectively.The result is a noticeably quieter clean that enhances everyday comfort while unlocking the full potential of Boosted Large-Airflow Suction Technology (BLAST)—delivering powerful, high-efficiency suction that’s strong yet remarkably unobtrusive, so you can clean with confidence and without disruption.

TruePass Adaptive 4-Wheel-Drive Climbing System

The TruePass Adaptive 4-Wheel-Drive Climbing System adopts an innovative mechanical climbing system to guarantee a reliable crossing over most household thresholds. When facing impassable obstacles, the robot instantly deploys two auxiliary levering wheels. Their soft rubber gripping teeth can firmly latch onto surfaces—dramatically boosting climbing ability to handle a single stage up to 2.4cm height and continuous stages up to 4cm height. Unlike vision-based systems, this purely mechanical mechanism activates immediately upon contact, ensuring flawless, on-time engagement and eliminating missed or failed climbing attempts for truly seamless cleaning.

AIVI 3D 4.0

AIVI 3D 4.0 Omni-Approach Technology, powered by the VLM model and deep learning neural networks, delivers precise object recognition and instant contour detection. The front structured light and TruEdge 3D Edge Sensor work seamlessly to enable close-edge cleaning while maintaining safe contact. Enhanced with an advanced semantic model, it now intelligently identifies special obstacles—cleaning extra close to safe edges like furniture bases while keeping a stable distance from unstable items such as cords or pet belongings. The result is thorough, adaptive cleaning that’s both precise and aware.

Triple Lift with Precision Dry-Wet Separation

The DEEBOT T90 OMNI’s intelligent Triple Lift System delivers precision cleaning while protecting every type of floor. On carpets, the mop roller automatically lifts to prevent moisture, while suction intensifies for a deeper clean. For liquid spills, both brushes lift to avoid cross-contamination, tackling stubborn stains with a precise grid-pattern wash or lighter spills with efficient triple-pass mopping. When dealing with large debris, the side brush retracts to prevent scattering as suction power increases. Engineered for seamless dry-wet separation and adaptive performance, it ensures every clean is powerful, precise, and floor-friendly—so you always come home to spotless floors, no compromises needed.

AI Instant-Remop 2.0

AI Instant Re-Mop 2.0 enables DEEBOT T90 OMNI to detect various types of stains and conduct a deep cleaning process correspondently. It performs two cross-pattern passes to remove stubborn stains, and then powerfully rinses the mop afterwards to prevent cross-contamination.

95mm Height of Robot

Through the adoption of embedded radar and comprehensive structural optimization, the DEEBOT T90 OMNI maintains an ultra-slim body of just 95mm, even equipped with a water renewal system and extendable structure.

Fresh-flow Power Washing

DEEBOT T90 OMNI redefines mop cleaning with its advanced, temperature-controlled Fresh-Flow Power Washing system. Unlike conventional methods that recycle dirty water, it uses a new high-pressure direct pump to deliver clean water—heated up to 75°C—through 32 precision nozzles. This process loosens deep-seated dirt while thoroughly saturating the mop roller for optimal cleaning performance. A dual-layer scraping mechanism then extracts wastewater and stains, while the rapid-drain structure instantly flushes away residue—preventing any cross-contamination with the clean mop. The result? A truly efficient and hygienic clean every time. No more “washing with dirty water”—just pure, fresh-flow performance that keeps your floors spotless and your routine effortless.

With Auto Empty

Auto Empty technology lets you enjoy up to 90 days of zero maintenance—the dustbin empties itself automatically. Combined with a 150-day maintenance-free mop washing tray, you only need to disassemble it for cleaning once or twice a year. This is true hands-free cleaning that works tirelessly in the background, keeping your home consistently fresh and giving you more time for what truly matters.

Dirty Water Box Auto-Cleaning

The self-cleaning wastewater system ensures long-lasting, maintenance-free performance. An integrated high-speed propeller spins at up to 5,000 RPM to actively break down residue, while the straight-down drainage design and independent wastewater trough allow rapid sediment removal. During each Fresh-flow Power Wash cycle, the system cleans itself thoroughly—preventing wastewater from ever touching the mop roller again. This eliminates odors, avoids secondary contamination, and delivers truly hygienic, hands-free cleaning day after day.

Refined Design, Intuitive Harmony

DEEBOT T90 OMNI embraces a refined, minimalist aesthetic that balances human-centric practicality with quiet sophistication. It reflects a warm, intuitive design philosophy—rooted in simplicity, natural affinity, and everyday adaptability.

Orchestrating Harmony and Calm for the Home

DEEBOT T90 OMNI's visual harmony complements its quiet, hassle-free functionality, creating a sense of calm and cleanliness in the home. The monochromatic point-cloud texture expresses a restrained design language, revealing subtle highlights as light glides across its surface. Meanwhile, the fabric-like finish offers a soft visual tone and a skin-friendly touch—all crafted to be durable, easy to clean, and seamlessly integrated into modern living spaces.

AGENT YIKO

Powered by next-generation logical reasoning, this self-evolving Autonomous AI Agent transcends conventional systems through deep, multi-step analysis of your space and habits. It autonomously maps your home, identifies floor types and pet zones via intelligent scene recognition, and then constructs adaptive cleaning plans via human-like reasoning. Beyond reactive assistance, AGENT YIKO proactively anticipates needs by cross-referencing user routines, room layouts and object density. It devises 360° cleaning strategies through multi-variable deep analysis while continuously fine-tuning critical settings—suction, water flow, route planning—in real-time. The outcome? Truly autonomous management that thinks ahead, not reacts. From effortless onboarding to daily refinement, it unlocks DEEBOT's full potential with zero manual intervention.

Upgraded Pet Care Strategy

DEEBOT T90 OMNI with AGENT YIKO isn’t just built to clean—it’s designed to live harmoniously with your furry friends. Using intelligent sensing and enhanced computing power, it gently avoids your pets. You can set custom activity zones and furniture areas, allowing AGENT YIKO to focus cleaning where it’s needed and gently handle traces pets leave behind. Whether you're at home or away, enjoy a spotless space and a happy pet—with no compromises.

Summary: Ecovacs Automated Vacuum Cleaner 30,000Pa Suction, Instant Self-Cleaning OZMO Roller Mop . Dust container type: Bagless, Product colour: Black, Grey, Shape: Round. Dust capacity (vacuum cleaner): 0.25 L, Base station functions: Charging, Purification, Noise level: 60 dB. Runtime: 350 min, Charging time: 3 h, Power consumption (typical): 650 W. Battery technology: Lithium-Ion (Li-Ion), Battery capacity: 6400 mAh. Ecovacs technologies (floor care): ZeroTangle 4.0, Ultrasonic carpet detection, AI Stain Detection 2.0, Temperature-controlled mop... | Vendor Homepage: https://www.ecovacs.com/us/shop/deebot-robotic-vacuum-cleaner/deebot-t90-omni | Dust container type: Bagless | Product colour: Black/Grey | Shape: Round | Dust container type (base): Dust bag | Remotely operated: Yes | Number of wheels: 4 | Bumper guard: Yes | Wet mopping: Yes | Dust capacity (base + vacuum cleaner): 2.5 | Dust capacity (vacuum cleaner): 0.25 | Dust capacity (base): 2.5 | Water tank capacity: 0.11 | Clean water tank capacity (base): 4 | Dirty water tank capacity (base): 2.2 | Self-cleaning station: Yes | Self-emptying dust container: Yes | Self-washing: Yes | HEPA filtration system: No | Vacuum air filtering: Anti-bacterial filter | Suction power adjustment: Manual | Automatic base station return: Yes | Base station functions: Charging,Purification | Obstacle crossing up to: 24 | Obstacle detection technology: RGB AI+ Supplementary Light | Frequency band: 2.4 - 2.4835 | Wi-Fi: Yes | Brush type: Roller brush & Side brush | Number of brushes: 2 | Tangling detection: Yes | Automatic dirty water collection: Yes | Automatic mop drying: Yes | Detachable cleaning tank: Yes | Floor surfaces supported: Carpet/Hard floor | Integrated sensors: Camera/Ultrasonic sensor | Low water alarm: Yes | Mopping area (full tank): Yes | Navigation type: TruEdge 3D,AIVI 3D 4.0,Mini-ToF | Noise level: 60 | Number of mop wetness levels: 3 | Threshold climbing (max): 0.9 | Video streaming: Yes | Washable filter: Yes | Battery technology: Lithium-Ion (Li-Ion) | Number of battery cells: 1 | Battery capacity: 6400 | Runtime: 350 | Charging time: 3 | Power consumption (typical): 650 | Power consumption (standby): 2 | AC input frequency: 50/60 | AC input voltage: 220 - 240 | Fast charging: Yes | Processor model: Rockchip RV1126B | Ecovacs technologies (floor care): AI Stain Detection 2.0/Temperature-controlled mop washing/Ultrasonic carpet detection/ZeroTangle 4.0 | Height:
