Aprašymas

The new Lanberg WF03 series of wall-mounted cabinets is a development of the previous WF01 and WF02 lines, offering hanging 19" rack cabinets with much smaller dimensions and depth. With a compact format of 540×350×370 mm, these units are an ideal choice not only for large companies, but also for small and medium-sized businesses and home users - wherever low-current (low-voltage) installation is required, such as in local LANs or CCTV systems. Available in 19" widths and heights of 4U, 6U, 9U, and in two color variants (black RAL9004 and gray RAL7035), the WF03 models allow full wiring arrangement and protection of devices even in limited spaces.

Simple, convenient installation

Assembly of the new WF03 wall-mounted cabinet from Lanberg has been designed with user comfort in mind. Clear paper instructions, an additional video version and an included set of M6 screws ensure an intuitive and quick assembly process - whether you are assembling the equipment in a professional server room or a home workshop. This allows you to get straight to organizing the interior of your ICT cabinet and make the installation best suited to your needs.

Durable RACK cabinet designed to last for years

WF03 cabinets are a highly resistant product. They are made of high-quality materials, including cold-rolled steel with a thickness of at least 1 mm (for the top and bottom panels) and 1.2 mm (for the frame), which translates into reliability and stability of the structure. The maximum load capacity is as high as 60 kg while keeping the cabinet's own weight low (about 10 kg).

Glazed doors on the front and access from the sides and rear of the cabinet through removable side panels and a removable back panel mean both high functionality and protection of equipment from accidental shutdown or damage. In addition, it is possible to mount the cabinet directly on the wall (through holes in the frame) or with the help of a special strip, which greatly facilitates installation in various conditions.

Excellent ventilation and room for a fan

To ensure adequate airflow, there are ventilation holes in the top and bottom panels. In addition, the cabinet has a special place for mounting a 120×120 mm fan, which significantly improves air circulation and reduces the risk of overheating equipment. Thanks to this, WF03 cabinets ensure optimal working conditions for the equipment installed in them and their long service life.

Convenient, handy FLAT PACK packaging

The new WF03 data communication cabinets from Lanberg come in "Flat Pack" format. This means that all parts of the design are unfolded and protected in a compact package, making it easy to transport even in cars with limited luggage space. The individual components are packed with care to minimize the risk of damage during transportation. When the shipment arrives at its destination, you can immediately proceed to assemble and assemble the equipment yourself, having full control over the final arrangement of the cabinet.

Techninė specifikacija

Features	
Rack capacity	6U
Type	Wall mounted rack
Maximum weight capacity	60 kg
Product colour	Black
Frame type	Closed
Front door construction	Glass
