Designed for Superior Cooling, optimized for Workstations

Thanks to its radiator design and high-performance fans, the Liquid Freezer WS360-SP5 delivers outstanding cooling under heavy loads while keeping noise levels comparable to competing solutions.

P12 Pro PST CO – Performance & Durability

The ARCTIC's P12 Pro PST CO pair the High Static-Pressure Performance of the P12 Pro with Dual Ball Bearings engineered for continuous 24/7 operation, ensuring durability and extended lifespan.

Tailored Made for SP5

A fixed mounting system tailored for AMD SP5 ensures optimal contact pressure on the CPU and user-friendly installation.

Water Block Design for Workstations

The water block is a brand-new design with high-density micro-fins, efficient chamber flow, and a durable pump for long-lasting reliability.

Premium-Class Radiator

Liquid coolers with 38mm radiators offer superior thermal dissipation, and we continued integrating this design into our workstation models.

High Quality EPDM Tubing

EPDM tubing with braided sheathing to ensure durability and prevent leakage, protecting your components is our highest priority.

Efficiency Engineered to Reduce Ownership Costs

Engineered for an outstanding Power Efficiency Ratio (PER). Capable of dissipating up to 800W of CPU Heat while consuming only 14.8W, it significantly reduces the Total Cost of Ownership (TCO) for high-performance workstations.

Xtender – Xtend your Potential

The Xtender is a high-airflow case designed for maximum air circulation. It accommodates motherboards up to the EATX format with a width of 285 mm and graphics cards up to 482 mm in length, making it suitable for workstation use.
