Aprašymas

CISCO CATALYST 1200: PERFORMANCE AND RELIABILITY AT AN AFFORDABLE PRICE

The Cisco Catalyst 1200 Series is a new generation of affordable switches that combine exceptional performance and reliability, offering a full set of features essential for small and medium-sized business networks. With a customized Linux operating system, these switches provide flexible management options and advanced security capabilities, as well as Layer 3 static routing features that significantly exceed the capabilities of unmanaged or consumer-grade switches. The Catalyst 1200 Series is the ideal solution for efficiently sharing online resources and connecting computers, phones, and access points, all at an attractive price.

BOOST YOUR BUSINESS EFFICIENCY WITH CISCO CATALYST 1200!

Cisco Catalyst 1200 Series Switches are the perfect solution for companies seeking a reliable and efficient network infrastructure. With high-speed connections, these devices enable quick and secure connectivity for employees in small offices and integration with printers and servers. The flexibility of wireless connectivity allows for easy network range expansion, which, combined with security features and Power over Ethernet Plus (PoE+), makes them an excellent foundation for deploying enterprise-class wireless solutions. Additionally, Quality of Service (QoS) features support integrated communications, enabling traffic prioritization and convergence of solutions, such as IP telephony and video monitoring.

INVEST IN CISCO CATALYST 1200 – SIMPLICITY AND PERFORMANCE

Cisco Catalyst 1200 Series switches are the ideal solution for small and medium enterprises looking to build an efficient enterprise-class network without straining their budget. With the intuitive Cisco Business Dashboard interface, users can easily manage their devices, customizing widgets to meet individual needs. Built-in tools, such as the device onboarding wizard and Cisco Network Plug and Play solution, simplify the configuration and update process, allowing for nearly touchless deployment of new devices. Additionally, modern web interfaces and the ability to connect via Bluetooth to laptops and tablets make network management quick and efficient, perfectly addressing the needs of contemporary businesses.

GAIN RELIABILITY AND PERFORMANCE WITH CISCO 1200 SWITCHES!

Cisco Catalyst 1200 Series Switches are synonymous with reliability and high performance, which are essential for modern businesses. With features such as 10 Gigabit Ethernet uplinks and Power over Ethernet, these switches significantly accelerate file transfers, eliminating issues with slow networks and ensuring continuous availability of critical business applications. Their advanced features, including Layer 3 static routing, allow for effective management of internal traffic, while built-in security protects against unauthorized access and attacks. Additionally, their compact and energy-efficient design makes them ideal for various environments, from offices to retail stores, while supporting sustainability through optimized energy consumption.

MANAGE YOUR NETWORK WITH EASE USING CISCO BUSINESS DASHBOARD

Cisco Business Dashboard is an innovative network management tool that significantly simplifies the handling of business infrastructure. Designed for Cisco Catalyst 1200 and 1300 series switches, as well as routers and access points, it automates deployment, monitoring, and network lifecycle management processes. For managed service providers (MSPs), it offers additional benefits, such as multi-client support and integration with leading service automation systems and remote monitoring tools. Additionally, the Cisco Business Dashboard Lite version, tailored for Windows, offers deployment simplicity and basic functionality, making it an ideal choice for users seeking an effective yet lightweight solution.

Comparison of Cisco C1200 8-port switches				
Model	C1200-8T-D	C1200-8T-E-2G	C1200-8P-E-2G	C1200-8FP-2G
Network Ports	8 x 1G	8 x 1G	8 x 1G	8 x 1G
Uplink Ports	N/A	2 x 1G RJ45/SFP combo	2 x 1G RJ45/SFP combo	2 x 1G RJ45/SFP combo
Power over Ethernet (PoE)	PoE input on port 1	Data only	PoE+ (67W)	PoE+ (120W)
Fan	No fan	No fan	No fan	No fan
Power Supply	External power supply	External power supply	External power supply	Internal power supply
Features	Layer 2 switching, VLAN, STP, ACL, QoS, static routing IPv4/IPv6	Layer 2 switching, VLAN, STP, ACL, QoS, static routing IPv4/IPv6	Layer 2 switching, VLAN, STP, ACL, QoS, static routing IPv4/IPv6	Layer 2 switching, VLAN, STP, ACL, QoS, static routing IPv4/IPv6

Techninė specifikacija

Matmenys ir svoris	
Matmenys (I × P × A)	30,00cm × 55,00cm × 10,00cm
Svoris	2,20kg
