Aprašymas

High transmission quality up to 8K: Supports resolutions up to 7680×4320 at 60 Hz – ideal for demanding AV applications.
Future-proof specification: Compatible with DisplayPort 1.4 including HDR, DSC 1.2 and MST for modern multi-monitor setups.
Reliable signal stability: Thanks to high-quality workmanship with gold-plated contacts and robust sheathing.
Backward compatible for maximum flexibility: Also supports older DP versions for versatile use.
Ideal for professional environments: Perfect for conference rooms, control centres, digital workplaces and system integration.

The InLine® DisplayPort 1.4 cable is the reliable solution for professional image and video transmission. It enables a bandwidth of up to 32.4 Gb/s and thus supports resolutions of up to 8K at 60 Hz and 4K at 120 Hz. This makes it ideal for demanding AV applications in companies, educational institutions or control centres.
Gold-plated contacts ensure optimum conductivity and reliable protection against corrosion, even with frequent use. The solid workmanship ensures high durability, even with intensive use. Thanks to Display Stream Compression (DSC) 1.2, High Dynamic Range (HDR) and Multi-Stream Transport (MST), the cable is ideally designed for modern systems. Backward compatibility with older DisplayPort versions allows seamless integration into existing infrastructures.
System houses, IT service providers and installers benefit from the easy handling and high operational reliability. The InLine® DisplayPort 1.4 cable is therefore the ideal choice for professional applications in digital signage, conference rooms or for multi-monitor setups in modern working environments.
