EIZO FlexScan EV2795-BK 27 colių monitorius

EIZO FlexScan EV2795-BK yra 27 colių Quad HD LCD monitorius, sukurtas efektyviam jungiamumui ir išskirtinei vaizdo kokybei. Su USB Type-C jungtimi šis monitorius leidžia rodyti vaizdo įrašus, atkurti garsą, perduoti USB signalus, tiekti energiją prijungtiems įrenginiams ir netgi perduoti tinklo signalą, todėl jis idealiai tinka lanksčioms darbo vietoms ir darbui nuotoliniu būdu.

Savybės:

- **USB Type-C jungtis:** Supaprastina jungtis, vienu laidu perduodant vaizdą, garsą, USB signalus, energiją (70W) ir tinklo signalus.
- **Stabilus tinklo ryšys:** Integruotas LAN prievadas užtikrina patikimą laidinį tinklo ryšį, pasiekiamą per USB Type-C.
- **Efektyvus kelių ekranų sąranka:** Palaiko „daisy chaining“ per USB Type-C, kad būtų lengva prijungti kelis monitorius.
- **Ergonomiškas dizainas:** Universalus stovas su aukščio, pakreipimo ir pasukimo reguliavimu optimaliam žiūrėjimo komfortui.
- **Akių komforto technologija:** Apima automatinį Auto EcoView ryškumo valdymą, popieriaus režimą mėlynos šviesos mažinimui ir nemirgančio vaizdo peržiūrą.
- **Integruotas KVM jungiklis:** Leidžia vartotojams naudoti vieną pelę ir klaviatūrą iki dviem prijungtiems kompiuteriams.
- **Priekiniai garsiakalbiai:** Integruoti garsiakalbiai užtikrina aiškų garsą neužteršdami jūsų darbo vietos.
- **VESA atitinkantis laikiklis:** Suderinamas su PCSK-03 laikikliu, skirtu plono kliento arba mini kompiuterio montavimui monitoriaus gale.

EIZO FlexScan serija yra žinoma dėl savo aukštos kokybės monitorių, skirtų produktyvumui ir komfortui padidinti. Dėmesys ergonomiškam dizainui ir pažangioms funkcijoms, EIZO suteikia išskirtinę vizualinę patirtį tiek profesionaliam, tiek namų naudojimui.

Streamlined Connection with USB Type-C

The monitor is equipped with a USB Type-C connection that allows you display video, playback audio, transmit USB signals, supply power to connected devices, and even transmit a network signal. This convenient multi-purpose connectivity makes it faster and easier to connect your laptop when moving between workstations or working away from the office.

70 W Power Delivery

The 70 W power delivery via USB Type-C reliably charges small desktop PCs or laptops such as a Microsoft Surface. This eliminates the need for a laptop's bulky power supply unit, freeing up space

in your bag and on the desk.

Stable Network Connection

While many modern laptops are not equipped with a dedicated LAN port, the monitor has one directly built in for a stable wired connection. Connecting any laptop via USB Type-C allows access to the network through the monitor. This allows you to conduct conference calls or data transfers reliably and at high speed.

EIZO MAC Address Clone Utility software temporarily assigns the MAC address of a connected PC to the monitor, granting network access to authenticated devices, and preventing network access from unauthenticated devices.

Connecting Peripherals Directly

While modern laptops are becoming thinner and more portable, they often have limited connectivity options for peripherals. Connecting to the monitor via USB Type-C gives access to a hub with three USB Type-A and one USB Type-C ports for easily connecting an external keyboard, mouse, or web camera.

Efficient Multi-Screen Setup

The monitor's USB Type-C connection supports daisy chaining for easily connecting multiple monitors from a single video signal output. This allows you to effortlessly connect up to two screens and quickly view multiple applications simultaneously for boosting efficiency.

Aesthetically Pleasing Design

A monitor's aesthetic can go a long way in creating a more comfortable atmosphere. The monitor's minimalistic design and its ergonomic functions allow it to fit naturally in your work environment, whether you are at home or in the office.

Versatile Stand for Optimal Positioning

The stand has a wide adjustment range, featuring height adjustment, tilt and swivel. This allows the user to set the monitor to the perfect position. At maximum height, the user can also comfortably place a small laptop under the screen to save space in even the most limited workspaces.

Reduce Cable Clutter with Daisy Chain

Pateikta prekės informacija yra orientacinio pobūdžio. Techninės savybės, nuotraukos, aprašymai ir kaina gali keistis be išankstinio perspėjimo. Cable management becomes easier with USB Type-C. Multiple monitors can be connected in a daisy chain using the short 1 meter cable, CC100, tidying up the back of your desk for an even cleaner office aesthetic.

Free Up Your Workspace with a Stand Bracket

The PCSK-03 is a VESA-compliant bracket for easily mounting a client, such as a thin client or mini PC to the back of the monitor. The space the client terminal previously occupied is now freed up allowing the users to make better use of their work area. The monitor stand can be adjusted freely, even with the client terminal attached.

Say Goodbye to Tired Eyes

The monitor is equipped with functions to help users concentrate on work by keeping their eyes comfortable throughout the day.

Auto Brightness Control

To prevent eye fatigue, a brightness sensor called Auto EcoView detects the changes in the ambient brightness that occurs throughout the day and automatically adjusts the screen to the ideal brightness level.

Clear View from All Angles

The monitor uses an LED-backlit IPS (in-plane switching) LCD panel with 178° viewing angle that minimizes color shift and contrast changes when viewing the screen at an angle. This means that two people sitting at the one computer can easily see the screen with high image quality.

Reduce Blue Light by 80%

In the visible light spectrum, blue light has wavelengths adjacent to ultraviolet light. Compared to the factory preset setting of 6500 K of typical LCD monitors, Paper Mode is closer to the spectral distribution with long reddish wavelengths so it reduces the amount of blue light, a cause of eye fatigue, and helps prevent eyestrain when reading documents. When used in conjunction with Auto EcoView dimming function, blue light can be reduced by as much as 80%.

Flicker-Free Viewing

Due to the way brightness is controlled on LED backlights, a small number of people perceive flicker on their screen which causes eye fatigue. The FlexScan EV2795 utilizes a hybrid solution to regulate

brightness and make flicker unperceivable without any drawbacks like compromising color stability – even on low brightness settings.

Minimum Brightness of 1 cd/m²

In a dimly-lit work environment, a monitor with low brightness settings is more comfortable to use. With its LED backlight, the monitor is adjustable to approximately 1 cd/m² which is less than 1% of the maximum.

Non-Glare Panel

A non-glare panel reduces eye fatigue by dissipating reflective light that would otherwise make the screen difficult to view from different positions.

Built-In KVM Switch for Multiple PC Operation

The monitor's USB Type-B and Type-C upstream ports have a built-in KVM function, allowing users to use a single mouse and keyboard for up to two connected PCs for an even cleaner workspace. Furthermore, the peripherals connected to the monitor's USB hub and its network connection switch to the selected PC for a smooth operation on the selected computer.

Hassle-Free Approach

The monitor's stand is equipped with a Quick Release button that allows you to detach the screen with a single touch. It also has a convenient carrying handle on the back for easily moving the monitor. Furthermore, the cable cover on the back of the stand allows you easily manage cables, keeping the work area free of clutter.

Front-Facing Speakers

The monitor has speakers incorporated into the minimalist front bezel, ensuring that sound is focused on the user and not on people behind the monitor.

Exceptional Image Reproduction

The monitor converts the data from an 8-bit input signal and selects the optimal gradations for smooth image display. Furthermore, each monitor is individually measured and adjusted at the factory prior to shipping for exceptional image quality out of the box.

Synchronize Screen Adjustments

Screen InStyle will apply any color adjustments you make to one monitor to the others on your desktop for consistent color across all screens. In addition, any changes detected by the brightness sensor of one monitor you assign will be applied uniformly to your other monitors. Furthermore, when daisy chaining multiple monitor monitors with USB Type-C, changes are conveniently reflected on all connected monitors automatically.
