Aprašymas

Insta360 Wave (black)

Insta360 Wave is a smart conference hub that redefines communication quality—combining studio-clear audio with 8 MEMS microphones, precise reduction of over 300 types of noise, and intelligent de-reverberation to make every voice sound natural and clear. With five directionality modes, DOA technology, speaker recognition, transcription in 99 languages, and AI features (notes, summaries, chat, glossary), the device not only records meetings, but also organizes and streamlines them. If you care about smooth, professional meetings and full control over information, Insta360 Wave is the choice that takes communication to a new level.

Crystal-clear studio-quality sound

With an advanced sampling rate of 48 kHz and 8 MEMS microphones, Insta360 Wave captures speech with incredible detail—even from a distance of up to 5 meters. Automatic Gain Control ensures optimal volume levels, whether you're speaking quietly or giving a passionate presentation. The

result? A natural, full, and clear voice, without distortion or loss of detail.

Noise reduction thanks to AI

An advanced artificial intelligence system identifies and eliminates over 300 types of ambient sounds – from air conditioning noise and keyboard clatter to background conversations. Regardless of the conditions, your voice remains clear, intelligible, and free from interference. Thanks to an intelligent de-reverberation algorithm, Insta360 Wave eliminates the hollow and metallic sound characteristic of weaker audio systems. Every word sounds warm, natural, and professional – just like in a face-to-face conversation.

Precision tailored to the space

Adjust the sound pickup characteristics to your needs and acoustic conditions with five modes: Omni, Cardioid, Supercardioid, Figure-8, and Stereo. Precisely designed directional patterns allow you to achieve optimal results for both one-on-one meetings and team conversations.

Design that focuses on quality

The unique, floating form not only gives the device a modern, futuristic look, but also improves acoustics. The integrated touch screen on the underside allows for intuitive gesture control and real-time transcription preview. The device's performance is powered by an advanced AI chip that provides on-device AI processing. This means faster response, greater stability, and exceptional quality without delays or compromises.

Fully intuitive and optimized speakers

Simple taps and swipes allow you to fully manage the device's functions. Insta360 Wave is quick and natural to use and requires no advanced configuration—everything works exactly as it should. What's more, the device's speakers have been specially designed to amplify and enhance speech. This ensures that conversations are clear on both sides – you hear perfectly and are heard perfectly.

Smart notes and synergy with Insta 360 Link 2

The device automatically recognizes speakers and assigns their statements to them, creating a clear transcript in one of 99 supported languages. This is a real help in organizing information. You can check meeting summaries, task lists, and interact with AI through the intuitive Insta360 InSight interface. Plus, when you connect Insta360 Wave to the Insta360 Link 2 camera, you get a complete, integrated, premium audio-video set. Just place Link 2 on top of Wave to create a smart conference center—the camera, microphone, and speaker work in perfect sync, offering smoothness and quality without compromise.

Scalability for large spaces

Need to fill an entire room with sound? Wirelessly connect multiple Insta360 Wave devices to create an audio system tailored to any room size. Simple, flexible, and ready to grow with your team. What's more, thanks to DOA (directional object awareness) technology, Wave detects the direction of the voice, allowing the Link 2 camera to automatically switch focus between speakers. Dynamic meetings with multiple participants become more natural and professional.

Full control with one touch

Insta360 Wave acts as an advanced AI recorder that lets you start recording with one touch and instantly mute or pause recording at any time. The built-in 32 GB memory can store up to 1,000 hours of MP3 recordings, and support for internal recording and direct system audio recording ensures clear, detailed, and accurate reproduction of every meeting. Pre-Recording mode records background audio and, when you press "record," saves the last 5 minutes of conversation. Ideal when a conversation suddenly takes an unexpected turn or you want to be sure to capture key moments.

Reliable features that make your work easier

An advanced AI chip and intelligent cloud processing work together to deliver fast, accurate, and clear transcripts. Your statements are recorded with exceptional precision, which speeds up information transfer and increases communication efficiency. The system automatically identifies conversation participants and assigns their statements in the transcript, and recordings are stored locally, allowing for speaker recognition and even

more organized notes. You can also create your own dictionary of key concepts, industry terms, and proper names. Insta360 Wave will recognize and record selected expressions, ensuring their correctness and consistency in every conversation.

AI chat and convenient file sharing

Ask questions after the conversation is over, and Insta360 InSight will provide answers based on the recorded data. All information is fully verifiable and linked to its source, giving you confidence in its accuracy. Want to share your recordings with others? Use the QR code that appears on the device screen. You can also customize the scope of shared content through Insta360 InSight, maintaining full control over what reaches your audience.

Precise control and convenient connectivity

The optional desktop controller allows you to precisely manage Wi-Fi, audio, recording, screenshot, and reminder settings. From business meetings to live streams, Insta360 Wave seamlessly integrates with popular platforms, offering studio-quality audio and full control in any situation. Choose from multiple connection options—USB, Bluetooth, or Dongle—and use Insta360 Wave exactly as you need it. Hassle-free setup works for both office and mobile work environments.

Included

- Insta360 Wave
- Storage bag
- User manual

Audio

Number of microphones	8
Microphone type	MEMS
Frequency response	20 Hz ~ 20 kHz
Audio sampling rate	48 kHz
Audio recording range	5 meters (16.4 feet)
Rated power	5 W
Maximum sound pressure level	91 dB SPL @ 0.5 m/1 W

Audio algorithm

Full duplex audio	Yes
Automatic noise reduction (ANS)	AI noise reduction, removing over 300 common noises
Automatic gain control (AGC)	AI AGC
Automatic echo reduction (AEC)	AI AEC
Echo filtering	AI-based
Beamforming	Omnidirectional, cardioid, supercardioid, figure-8, stereo
Audio modes	Noise reduction, original sound

Hardware

Processor	AI chip
Memory	4+32 GB
Battery capacity	9800 mAh
Input power	9 V/2.2 A, 5 V/3 A
Charging time	5 hours
Battery life (talk time)	Up to 12 hours
Screen size	1.82-inch customized touch screen
Connection method	Dongles, Bluetooth, USB
Device cascade	Supports wireless connection of 3 devices (feature will be available in a future OTA update)
Dimensions	Ø64.3 mm (2.53 inches); raised position: 248 mm (9.76 inches), folded position: 198 mm (7.80 inches)
Weight	490 g (17.3 oz)
Operating temperature	0–40 °C (32–104 °F) *Tested in laboratory conditions.
Colors	Graphite black

System requirements

Computer	Windows 10 or later, MacOS 12 or later
Mobile phone/tablet	Android 10 or later, iOS 12 or later, iPad OS 12 or later
