Compact design with 33W total power: Ideal for use in IT environments or in service
High compatibility thanks to wide input voltage range: Perfect for international use

The InLine® Power Delivery USB power supply is the ideal solution for professional users who value reliable, fast and safe charging of their USB end devices. With an output of up to 33 W, the charger provides enough power to operate smartphones, tablets and other USB devices efficiently - even when used in parallel via USB-C and USB-A.
Support for current charging protocols such as USB Power Delivery 3.0 and Quick Charge 3.0 ensures that devices are optimally supplied with power - with minimal charging time. The integrated protection chip offers additional safety through overcurrent, overheating and overvoltage protection - a decisive advantage in sensitive working environments such as system houses, technical centers or maintenance areas.
The compact design saves space in service trolleys, technical cabinets or at the workplace. Thanks to the wide input voltage range (100-240 V), the power supply unit is also ideal for international use. With the InLine® USB power supply, you can rely on quality, safety and efficiency - whether in daily IT operations or in demanding project business.

PPS output: 3.3-11V / 3A (max. 33W)
USB-C+USB-A together: 5V / 3A (max. 15W)
Frequency: 50/60 Hz, 0.8 A
Output voltage: 5-20 V DC
Output current: max. 3.0 A
Power consumption at no load: 0.08 W
Efficiency at low load: 74.0%
Average efficiency during operation: 83.0%

Techninė specifikacija

Performance	
Charger type	Indoor
Charger compatibility	Smartphone, Tablet, Universal
Power source type	AC
USB 2.0 ports quantity	1
