Pagrindinės savybės

- ✓ Kompiuterio korpusui Ventiliatorius 12 cm
- ✓ 120 x 25 x 120 mm
- ✓ Rankovinis guolis
- ✓ Juoda

Aprašymas

Improve the airflow inside your case with the GENESIS Oxal 120 ARGB. This high-performance fan has been developed for cases with dense filters, thus providing significantly better performance compared to standard solutions. Good working culture? You can count on it thanks to high performance even at low speeds and a reinforced, long-life bearing (up to 50,000 h). And that's not all. The GENESIS Oxal 120 in ARGB version will illuminate the interior of your computer and allow you to easily integrate it into any space.

EQUIP YOUR CASE WITH THE GENESIS OXAL 120 ARGB

Meet the GENESIS Oxal 120 ARGB - the fan that, in a non-illuminated version, made its appearance in our highest-performance Genesis Irid 505F and Diaxid 605F chassis, placing them among the best-ventilated products in journalistic tests. Its high performance is the result of the combination of a 120 mm diameter with a maximum speed of 1450 RPM, but also a good static pressure. This guarantees adequate airflow in enclosures with standard as well as compacted filters, whose main task is to limit the amount of dust entering the case. Efficient component cooling has never been

easier.

HIGH PERFORMANCE EVEN AT LOW SPEEDS

The GENESIS Oxal 120 ARGB is a fan that provides optimal performance already at much lower speeds than the maximum 1450 RPM. Do you expect a balance between performance and silence? You can achieve this by setting the speed to 80% of its capacity. On the other hand, the maximum speed (up to 100%) is suitable for demanding situations with overclocked components under full load.

SIMPLE INSTALLATION

The GENESIS Oxal 120 ARGB is equipped with a 3-pin connector with a male and female connector. This will allow you to connect the fan directly to the motherboard and use it to control not only the backlighting, but also the speed, for example in relation to the current CPU temperature, and that's not the end of it. The double-ended connector makes it easy to connect several fans together and to plug them into a single socket, which makes it easier to keep everything tidy inside the case.

AVAILABLE AS A SET

Equip your case with up to 3 additional GENESIS Oxal 120 ARGB fans and feel the difference. The GENESIS Oxal 120 ARGB 3-Pack will also help you use the full potential of your case.

Techninė specifikacija

Veikimo charakteristikos	
Tinkama vieta	Kompiuterio korpusui
Tipas	Ventiliatorius
Ventiliatoriaus skersmuo	12 cm
Impulsų pločio moduliacijos (PWM) palaikymas	Ne
Ventiliatoriaus laikiklio tipas	Rankovinis guolis
Ventiliatoriaus triukšmo lygis (maks.)	22,1 dB
Ventiliatoriaus greitis (min.)	1150 RPM
Ventiliatoriaus greitis (maks.)	1450 RPM
Ventiliatoriaus statinis slėgis	1,7 mmH2O
Ventiliatoriaus vidutinis laikas iki gedimo (MTTF)	50000 h
Konstrukcija	
Produkto spalva	Juoda
Medžiaga	Plastikas
Ventiliatorių skaičius	3 ventiliatorius(iai / ių)
Apšvietimo LED	Taip
Ventiliatoriaus jungtis	3 jungčių
Energijos valdymas	
Ventiliatoriaus energijos suvartojimas	1,8 W
