Aprašymas

ARZOPA E1 15.6" Portable Monitor

The ARZOPA E1 is a portable monitor with two 15.6" IPS screens that, when unfolded, creates an additional workspace for a laptop, desktop computer, smartphone, or game console. Each screen offers Full HD resolution (1920 × 1080), 300 cd/m² brightness, 100% sRGB color gamut coverage, and a 1200:1 contrast ratio with HDR10 support, ensuring that the image remains clear and natural during work and entertainment. The foldable aluminum alloy design weighs just 1.58 kg and features an integrated stand with up to 80° of adjustment, making it easy to use the monitor virtually anywhere. With two USB-C ports supporting DisplayPort and Power Delivery, as well as a mini HDMI 2.0 connector, the monitor can be quickly connected to laptops, computers, smartphones, tablets, and PlayStation, Xbox, and Nintendo Switch consoles.

Two screens provide more workspace

The ARZOPA E1 is designed for people who work with multiple applications at the same time. Two 15.6-inch displays arranged vertically allow you to comfortably view documents, spreadsheets, email, messaging apps, and development tools without having to constantly switch between windows. The larger workspace helps you organize your work more effectively and makes performing daily tasks more comfortable.

A foldable, travel-ready design

When you’re done working, the monitor folds into a slim form factor, so it easily fits in a bag or backpack alongside your laptop. The aluminum alloy housing ensures adequate durability while maintaining a lightweight design of approximately 1.58 kg. This is a practical solution for remote workers, business travelers, and students.

The built-in stand allows for quick monitor setup

The integrated stand, with a tilt adjustment of up to 80°, lets you position the monitor on virtually any desk or table without the need for additional accessories. The design is intended exclusively for freestanding use with the built-in stand and does not support the VESA standard; therefore, the monitor cannot be mounted on wall mounts or desk arms.

Full HD IPS Panels with Natural Color Reproduction

Each screen features a Full HD (1920 × 1080) IPS panel, offering wide viewing angles and a detailed image. With 100% sRGB color space coverage, the monitor is well-suited for photo editing, graphic design, and multimedia production. A brightness of 300 cd/m² and a contrast ratio of 1200:1 ensure good readability, while HDR10 support enhances the visibility of details in both bright and dark scenes.

Universal Compatibility and Convenient Connectivity

The monitor works with most modern devices equipped with USB-C or HDMI. Two USB-C ports simultaneously support video transmission via DisplayPort Alt Mode and Power Delivery, allowing you to use a single cable in many cases. An additional mini HDMI 2.0 port allows you to connect computers, laptops, and other devices equipped with an HDMI output. The ARZOPA E1 is compatible with Windows and macOS laptops, PCs, tablets, select smartphones, and PlayStation, Xbox, and Nintendo Switch consoles.

Several display modes tailored to different tasks

The monitor supports various operating modes, allowing you to customize the display to suit your tasks. Extended mode expands your workspace, mirror mode displays the same image on all screens, while vertical split mode makes it easier to work with long documents, code, or web pages.

Built-in speakers and intuitive operation

The model is equipped with two 1 W speakers, which are ideal for video conferences, watching movies, or everyday multimedia use. Buttons on the housing allow for convenient adjustment of brightness, volume, and other display settings via the OSD menu.
