Aprašymas

RayNeo iO AI Glasses

The black RayNeo iO AI Glasses combine the classic design of eyewear with a smart assistant, a MicroLED display, and features that help with daily organization. Weighing just 33 g, they offer brightness of up to 1,300 nits, 97% transparency, and a 23.5° field of view, allowing the most important information to be displayed directly in the user’s field of view. The built-in 240 mAh battery provides up to 2 days of continuous use, and features such as notifications, a schedule, notes, live translation, and Life Log reduce the need to constantly reach for your phone. A charging case is included with the set.

Lightweight Design and Discreet Display

RayNeo iO utilizes the miniature Firefly Optical Engine Nano with a volume of 0.085 cm³ and a monochrome green MicroLED display. The entire system works in conjunction with a transparent Blue Lake waveguide just 0.6 mm thick, which has allowed for a slim design reminiscent of traditional eyeglasses. The use of a magnesium-aluminum alloy frame and aerospace-grade titanium temples helps reduce the device’s weight and increases comfort during extended wear.

Life Log and Smart Daily Organization

The Life Log feature can record information that comes up throughout the day and organize it into a searchable log. Conversations, meetings, ideas, or brief notes no longer need to be written down manually each time, and finding the information you need later becomes easier. The RayNeo

Suggestions system uses the accumulated context to remind you of, among other things, topics discussed, upcoming tasks, and other relevant information.

Translation and Information Without Reaching for Your Phone

The glasses let you check your schedule, notifications, the weather, and notes directly in your field of view, allowing you to get the information you need faster while working or going about your daily activities. The live translation feature supports 55 languages and 109 accents, and the translated text appears on the glasses' display. A hybrid microphone system with a VPU bone conduction sensor handles voice capture.

Privacy and Readiness for Everyday Use

RayNeo iO was designed with the principles of Privacy by Design in mind, and the manufacturer highlights, among other features, local data processing and anonymization before data leaves the device. The glasses meet the IP54 protection rating, making them resistant to dust and splashes that may occur during normal use. The device also complies with GDPR requirements and holds ISO 27001, ISO 27701, CE, and FCC certifications, among others.

Convenient Storage and Charging

The RayNeo iO comes with a charging case that not only protects the glasses during storage and transport but also allows them to be charged when placed inside. A built-in LED indicator shows the current charge level of both the glasses and the case, making it easy to check whether the device is ready for use. The case itself is charged via a USB-C port using a 5 V power source, allowing you to use popular chargers and cables compatible with this standard.

Included

- RayNeo iO AI glasses
- Charging case

Manufacturer	RayNeo
Model	RayNeo iO
Color	black
Weight	33 g
Construction	Magnesium-aluminum alloy frame, aerospace-grade titanium temples
