Aprašymas

FREEWELL Wide-Angle Lens Kit for Insta360 Luna

The FREEWELL Wide-Angle Lens Kit for Insta360 Luna lets you capture a wider perspective and better control exposure while recording. The 0.75x wide-angle lens increases the field of view, allowing you to capture more details in your shots while traveling, filming landscapes, or shooting dynamic scenes. The kit also includes three filters—ND8, ND32, and ND128—which help you adjust the amount of light reaching the lens to suit the prevailing lighting conditions.

Quick filter changes without unnecessary interruptions

ND filters attach directly to the wide-angle lens using a convenient slide-in system. This design allows you to quickly change filters without having to remove the lens. As a result, you can respond efficiently to changing lighting conditions and focus on recording.

Three ND filters for various lighting conditions

The set offers three levels of light reduction: ND8 (3 EV stops), ND32 (5 EV stops), and ND128 (7 EV stops). These allow you to control exposure in both moderate and very intense daylight. This makes it easier to avoid overexposed shots and achieve the right recording settings even on sunny days.

Included

- ND8 filter
- ND32 filter
- ND128 filter

Manufacturer	FREEWELL
