Aprašymas

FOSSIBOT FC360 Action Camera (Black)

The FOSSIBOT FC360 8K action camera is a device for recording 360° panoramic videos, equipped with two lenses with a 200° field of view and two 1/2" Sony CMOS sensors, each with a resolution of 48 MP. It offers 8K recording at 10 fps or 5.7K at 30 fps, PilotSteady™ image stabilization, and an invisible selfie stick feature. Users also get a 3-inch touchscreen, 6 GB of RAM, Android 10, dual-band Wi-Fi, Bluetooth, and built-in GPS. The camera also stands out for its IP68 water and dust resistance, interchangeable lens covers, loop recording, and support for microSD cards with capacities up to 1 TB. Thanks to these features, it’s perfect for filming trips, bike rides, and everyday activities.

360° Panoramic Recording in 8K Resolution

The FOSSIBOT FC360 uses two 1/2" Sony CMOS sensors, each with a resolution of 48 MP, and two fisheye lenses with a 200° field of view and an F2.0 aperture. This configuration allows for capturing 360° panoramic footage that encompasses the camera’s surroundings without needing to point it in a specific direction. The device supports recording in 8K resolution (7680 × 3840) at 10 fps, ensuring a high level of detail in scenes with low dynamic range. A 5.7K (5760 × 2880) mode at 30 fps is also available, providing smoother footage when capturing motion.

PilotSteady™ Stabilization – Less Shaking During Recording

Whether you’re biking, walking, or navigating uneven terrain, vibrations can affect video quality. PilotSteady™ stabilization technology reduces image shake, resulting in smoother and clearer footage. The camera is also equipped with a 9-axis IMU motion sensor that records information about

the device’s movement and orientation. Both features are standard on the FOSSIBOT FC360, designed for filming in a variety of conditions.

The Invisible Selfie Stick Effect

The Invisible Selfie Stick feature automatically removes the selfie stick from 360° panoramic images. This allows the user and their surroundings to be visible in the footage without the handle appearing in the frame. This feature is ideal for cycling, walking, or sightseeing, when you want to capture both yourself and the surrounding landscape. The selfie stick is not included in the kit and must be purchased separately.

IP68 Water Resistance and Interchangeable Lens Covers

The FOSSIBOT FC360 has a rated IP68 water resistance rating, meaning it is dust- and water-resistant. This is a useful feature when using the camera outdoors. However, before submerging the device, be sure to check the maximum depth, duration of contact with water, and requirements for protecting the lenses. The camera’s design also includes interchangeable lens covers.

3-inch touchscreen and Android 10

The camera is equipped with a 3-inch touchscreen with a resolution of 480 × 854 pixels. It is used to preview the image, review recordings, and adjust filming settings without the need to connect an additional device. The FOSSIBOT FC360 runs on an Android 10-based system and has 6 GB of RAM, which ensures smooth operation of the interface. Support for software updates directly on the camera allows you to install improvements released by the manufacturer.

Wi-Fi, Bluetooth, and Built-in GPS

The FOSSIBOT FC360 supports dual-band Wi-Fi (2.4 GHz and 5 GHz), enabling wireless communication with other devices. Bluetooth connectivity allows you to use additional accessories, such as a remote control for the camera. The Bluetooth remote control is sold separately and is not included in the package. The built-in GPS module is used to record location data, which can be useful for documenting routes and trips.

Two microphones and support for an external Bluetooth microphone

The camera has two built-in microphones that capture audio while recording video. This allows the user to record video along with ambient sounds without connecting additional equipment. The device also supports an external Bluetooth microphone. This feature is useful when recording interviews, travel reports, or content where greater control over voice recording is essential. An external microphone is not included in the package.

Loop Recording and Split Screen

The Loop Recording feature allows you to continuously record footage in a loop. Once the recording space is full, older files can be automatically overwritten by new ones. This is a practical solution during longer filming sessions when there’s no need to keep every piece of footage. A Split-Screen Video mode is also available, which displays two shots simultaneously in a top-bottom layout. This allows you to show two segments of footage in a single frame without having to edit them separately.

5.7K Panoramic Photos

In addition to recording videos, the FOSSIBOT FC360 takes panoramic photos with a resolution of 5760 × 2880 pixels. Wide-angle lenses capture expansive landscapes, city panoramas, and interiors, preserving the broader context of the scene being photographed. 360° photography is particularly useful while traveling and sightseeing, when it’s important to show the entire space rather than just a selected portion of it.

6 GB of RAM and storage for recordings

The FOSSIBOT FC360 features 6 GB of RAM, providing sufficient resources to run the Android system and support camera functions. The device is compatible with microSD cards ranging from 64 GB to 1 TB, which can be used to store videos and photos. The ability to use a high-capacity card is particularly important when recording in 8K, as high-resolution footage can take up a lot of space. The memory card is not included and must be purchased separately.

Gamintojas ir pardavėjas neatsako už galimus duomenų neatitikimus ar tipografines klaidas. Prieš įsigyjant rekomenduojame pasitikrinti aktualią informaciją.

Battery, Charging, and Weight

The camera is powered by a lithium-polymer battery with a rated capacity of 1600 mAh. The maximum charging power is 18 W, while the device’s power consumption does not exceed 9 W. The FOSSIBOT FC360 weighs approximately 205 g. The included protective case is used to store the camera and protect it during transport. The box includes a USB cable, but you’ll need to provide your own AC adapter.

Included

- FOSSIBOT FC360 8K EU Action Camera (black)
- Protective case
- USB cable
- User manual
- Battery safety warning card

Manufacturer	FOSSIBOT
Model	FC360
Color	black
Device type	360° panoramic action camera
Sensors	2 × 1/2" Sony CMOS
Sensor resolution	2 × 48 MP
Number of lenses	2
Lens field of view	200°
Aperture	F2.0
Video resolution	8K (7680 × 3840) / 10 fps
Additional video resolution	5.7K (5760 × 2880) / 30 fps
Photo resolution	5760 × 2880 pixels
Image stabilization	PilotSteady™
Motion sensor	9-axis IMU
Screen	3.0", touchscreen, multi-touch
Screen resolution	480 × 854 pixels
Operating system	Android 10
RAM	6 GB
Memory card support	microSD 64 GB – 1 TB
Wi-Fi	802.11 a/b/g/n/ac, 2.4 GHz / 5 GHz
Bluetooth	Yes
GPS	Built-in
Microphones	2 built-in
External microphone	Bluetooth microphone support
Loop recording	Yes
Split-screen mode	Yes

Invisible selfie stick effect	Yes
Interchangeable lens covers	Yes
Water resistance rating	IP68 (submersion conditions to be confirmed)
Indicator	RGB LED
Battery	Lithium-polymer, 1600 mAh (to be confirmed for the EU version)
Maximum power consumption	9 W
Maximum charging power	18 W
Operating temperature	0°C to 40°C
Operating humidity	20–90%
Weight	205 g
