trouble-free boss battles (including those in the office). And that's why we created the Supremo FM5 Gold 650W.

It's an efficient and relatively small (14 cm long) power supply with DC-DC topology dedicated to special tasks demanding components. We're serious – we've packed in everything we think you need to fine-tune the voltage and deliver continuous 650W of power without unexpected resets or a blue screen. We also fit a 12 cm 120 mm Fluctus fan, which will stay cool (literally!) and take care of the right temperature inside the PSU. No wonder our Supremo got the 80 PLUS® Gold certification :)
