Intel Core i5-10400F Comet Lake Processor for Desktop PCs

The Intel Core i5-10400F processor delivers excellent performance for modern desktop computing, covering everything from demanding gaming sessions to intensive multitasking and content creation. Built on the 10th generation Comet Lake architecture, this CPU combines a high core count

and impressive clock speeds, ensuring smooth and responsive operation across all applications.

Enhanced Performance Features:

- **6 Cores / 12 Threads:** Provides exceptional configuration for parallel processing, significantly improving frame rates in games and efficiency in multithreaded productivity applications.
- **Blazing Speeds:** Base clock speed of 2.9 GHz, accelerating up to 4.30 GHz using Intel Turbo Boost Technology when demanding performance is required.
- **Generous Cache:** Equipped with 12MB of Intel Smart Cache, allowing for quicker access to essential data and reducing latency during heavy workloads.
- **Efficient Power Usage:** Low Thermal Design Power (TDP) of 65 Watts, making it an excellent choice for balanced performance and efficient cooling solutions.
- **Platform Compatibility:** Designed for the Intel LGA1200 socket and supports fast DDR4 memory up to 2666 MHz.

Please note that the 'F' designation indicates that this processor does not include integrated graphics and requires a dedicated graphics card (GPU) to display video output.

INTEL is a globally recognized leader in semiconductor technology, constantly pushing the boundaries of computing performance and efficiency. They provide the foundational technology that powers millions of devices worldwide.

Order today from ++SHOP++ as we offer the best deals and fast shipping on all Intel processors.

Boxed Intel Core i5-10400F Processor (12M Cache, up to 4.30 GHz) FC-LGA14C
