HIGH-QUALITY WATER-RESISTANT TWEED MATERIAL

These days it is beyond crucial to keep your daily items housed in an environment that will prevent any kind of moisture from entering and causing damage to your electronic devices. They are simply too vital and integral to our day-to-day lives to be taking any chances with whatsoever. That is why we have made sure that this Anvik collection comes with its own high-quality water-resistant tweed material, so that you can have the confidence to go about your day with the knowledge that your most precious of possessions are safely housed in your bag, and will be from the start to the end of your journey, no matter the weather conditions.

COMPACT BUT CAPACIOUS

When designing this Anvik bag we wanted to make sure that it could carry all of the things you need for your day and yet still remain compact. We wanted to create something that was both incredibly

practical but also not too cumbersome. That is why we ended up with the roomy main compartment of this bag which further comes with a main zippered pocket for your passport or wallet. As a result, this Anvik backpack will be the perfect companion for those that like to remain prepared and composed for all the challenges ahead in their day.

ADVANCED PROTECTION

These days many of us have more than one device. Often we need that extra tablet or device that's better suited to a certain and specific task. We wanted to make sure that we created a bag that was capable of functioning for this kind of individual and so have included within this bag a specially padded pocket for laptops up to 13.3" which also features a pocket for a tablet up to 10.5". This means that should you need to slide away that extra bit of gear you can do, and know at the same time that they will be housed within an environment of enhanced protection.

TWO SIDE POCKETS

We at RIVACASE know the importance of keeping hydrated. Maintaining the right amount of water consumption throughout the day is key to both long term health and also short term success in your field. This is because it not only aids muscles and joints but also helps you maintain concentration levels. That is why we have provided a side pocket so that you can quickly store away or grab your bottle when you are in need of it. And we have another pocket too for your umbrella, in case you want to keep the kind of water you simply don't want, off your head and hair.

ERGONOMIC DESIGN OF THE BACK

The design of your bag is of paramount importance when it comes to the design of the back. A poorly made bag can lead to the weight being spread unevenly across your shoulders which can have profound effects not simply on your day through the discomfort it causes, but it also can have serious long-term health consequences if carrying heavy loads for extended periods. This bag though has been created with an ergonomic design so that weight is perfectly distributed across your shoulders, keeping you happy and safe.

COMFORTABLE CARRYING

There are few things worse than when you purchase a backpack only to find out that after a certain distance, carrying the thing around with you leads to serious discomfort. Often this can be the case with poorly constructed items with thin, cheap straps that can end up digging into your shoulder and

neck. This backpack though comes with comfortable shoulder straps with softened bands and a soft handle for carrying or hanging. All this means that no matter how long the journey is ahead you can be certain that you will remain comfortable and happy as you go about your day.

STRAP MANAGEMENT SYSTEM

Loose straps and ends can not only be an annoyance when they get in the way and reduce how compact you are as you move about your day but they can also pose a serious danger and threat to your safety. You want to do everything you can to prevent straps from becoming trapped in elevator or train doors, or getting snagged on branches say when traveling at speed when biking. In order to help you do this, we have created a strap management system for this backpack so that you can simply roll and fix the strapping in place with velcro and remain as compact as possible on your journey.

- Lightweight urban backpack for Laptops with screen up to 13.3"
- The backpack is made of water-resistant tweed fabric and has thickened sides to provide extra protection from accidental damage
- Along with the laptop compartment, this bag features a section for documents and pocket for Tablet up 10.5"
- Inner zippered pocket for a wallet, smartphone and documents
- Special side pockets for a bottle of water or umbrella
- Strap management system prevents excess strap material from dangling
