When life throws challenges your way, stay cool with the Fera 5 - a silent cooler that will chill your CPU.

Meet the Fera 5 - a cooler that will chill almost any processor. It's also small (15.5 cm tall), so it fits even in compact cases, where things often get cramped like fantasy conventions.

When you look at the Fera 5, you'll immediately notice a Fluctus 120 PWM fan and a densely finned heat sink. We designed them to give you the best possible cooling performance without any loud hum. After all, there are better things that you can listen to when you're using your PC ;)

The Fera 5 is compatible with popular sockets - you can easily install it on older and newer platforms alike. The assembly system is so simple that putting it together will take less time than reading this description.
