## Wi-Fi and ZigBee

The iHost Smart Home Hub provides comprehensive compatibility with devices using Wi-Fi and the ZigBee standard. This allows you to easily integrate and manage a variety of smart home devices, regardless of their communication protocol. The extensive ZigBee network, working with routers of this standard, provides stable and extensive coverage throughout the house.

## Local data storage

The security of your data is a top priority for iHost Smart Home Hub. All information, including scene, operation and security logs, is stored locally. This means you have full control over your data, which remains private and protected from outside access.

## Open API and integration

iHost PBX offers an open API and support for Docker containerization. This functionality enables advanced personalization by installing or creating add-ons that simplify daily use and enhance the functionality of your smart home.

## Configure and personalize eWeLink CAST

The iHost Smart Home Hub allows you to configure the central eWeLink CAST console, offering you the ability to create personalized boards. You can customize widgets, create custom panels, providing quick and convenient access to manage all your smart home devices.

## Support for add-ons and Text-To-Speech

In addition, the iHost Smart Home Hub supports add-ons, including Text-To-Speech features, which increases your ability to interact with your device. You can easily enter voice commands and receive voice notifications, making home management even simpler and more intuitive.

## The power of advantages

The kit includes everything you need to get up and running quickly: Wi-Fi control panel, RJ45 and USB-C cables, reset key and guides. The device, made of durable ABS material, has a sleek white

color that will blend in with any interior. With compact dimensions of 135 x 120 x 41mm, you'll easily find a place for it in your home.

## Even more possibilities

NEW! The SONOFF iHost gateway can serve as a Matter Hub after updating the software to version 2.4.0 or later. This makes it possible to add devices that support the Matter standard, such as lighting, switches (ON/OFF) and outlets. By default, the iHost also acts as a Matter Bridge, allowing the integration of connected devices with third-party Matter hubs.

## Included

- Wi-Fi control panel
- RJ45 cable 1m
- USB-C cable 1m
- Reset key
- Quick guide
- User manual
