The iHost Smart Home Hub provides exceptional compatibility with Wi-Fi LAN devices and the Zigbee protocol, allowing you to easily connect and control up to 128 devices. Internet independence in the event of an outage and interoperability with Zigbee routers allow for reliable management and expansion of network coverage throughout the home.

Local data storage

Data is stored locally, with full respect for your privacy. The iHost Smart Home Hub can store up to 2,000 data of any type, including scene, operation and security logs. This protects the security of your data and gives you quick access to your system's operating history.

Open API and Docker integration

Advanced customization becomes a reality with an open API and support for Docker. You can install or create add-ons that improve the functionality of your system, making daily use even more customizable.

Advanced interaction features

The iHost Smart Home Hub offers Text-To-Speech features, enhancing your ability to interact with your device. The ability to enter voice commands and receive voice notifications makes home management more intuitive.

Built-in microphone and speaker

The device is equipped with a built-in microphone and speaker, allowing direct communication with the system. In addition, four buttons for controlling basic functions provide easy access to the most important options.

Even more options

NEW! The Sonoff iHost gateway can serve as a Matter Hub after a software upgrade to version 2.4.0 or later. This makes it possible to add devices that support the Matter standard, such as lights, switches (ON/OFF) and outlets. By default, the iHost also acts as a Matter Bridge, allowing the
