Shelly EM + 50A Transformer Kit (Energy Consumption Measurement)

The Shelly EM combined with the 50A transformer is a comprehensive kit that allows you to gain full control over the electricity consumption in your home. Now you can precisely monitor how much energy various devices and electrical circuits consume. This enables you to make informed decisions about energy savings and managing your costs.

Track, Measure, Control

The Shelly EM is a device designed specifically for you to monitor the current and historical state of electricity consumption. With it, you have full access to data on electricity usage for the day, week, month, or even a year back. Whether you want to control energy costs in your home or care for the environment, Shelly EM is the answer to your needs.
