Deerma Water-suction Sweeper DEM-VX900W

Deerma DEM-VX900W is a 2-in-1 device that combines vacuuming and mopping function, offering comprehensive cleaning of various surfaces. With its high suction power (16,000 Pa) and long run time (40 min), the Deerma DEM-VX900W can handle larger surfaces and tougher dirt. What's more, the LED display provides real-time status of the device's operation, and voice prompts make it easy to use.

Advanced drive system - lightweight cleaning performance

The Deerma DEM-VX900W is equipped with a dual drive system that makes it easy to move the device over different surfaces. Thanks to the bi-directional motion support, the vacuum cleaner smoothly moves both forward and backward, significantly reducing the effort required for cleaning. Regardless of the type of surface - from carpets to hard floors - the Deerma DEM-VX900W ensures smooth and effortless cleaning.

Thorough cleaning

The innovative brush design of the Deerma DEM-VX900W vacuum cleaner allows for thorough cleaning without leaving hard-to-reach areas. The brush has an open design, which makes it adhere perfectly to edges and corners. This solution eliminates the problem of leaving residual dirt in corners and ensures perfect cleaning of all surfaces.

Intelligent dirt detection

The Deerma DEM-VX900W uses an advanced intelligent dirt detection system that automatically adjusts the suction power according to the level of dirt. Sensors analyze how dirty the surface is and increase or decrease the suction power accordingly. As a result, the device works efficiently, saving energy on light dirt and providing maximum power on tougher stains.

High suction power

Deerma DEM-VX900W vacuum cleaner is equipped with a motor with a suction force of up to 16000 Pa. Thanks to this, the device effectively collects various types of dirt. Whether you're dealing with spilled cereal, spilled drink or difficult stains, the Deerma DEM-VX900W can handle any challenge.

Self-cleaning function

The Deerma DEM-VX900W's two-way self-cleaning system provides comprehensive washing and rinsing of the brush and internal components of the machine. The process includes washing, rinsing and draining, eliminating the need to manually clean the brush.

Double drying - fast and effective

The Deerma DEM-VX900W is equipped with an advanced double-drying system. After cleaning, the brush is first subjected to centrifugal drying and then to 55°C hot air drying. This allows the brush to dry quickly, preventing the growth of mold and unpleasant odors. This feature eliminates the need to dry the brush by hand and keeps the equipment hygienic and fresh.

Automatic water refill station

The Deerma DEM-VX900W docking station is a one-stop center for the appliance that offers automatic water refilling, cleaning, drying, charging and storage. With this feature, the vacuum cleaner prepares itself for work, eliminating the need to manually fill the tank with water or clean the brush. The process is completely automated, saving time and effort.

Powerful battery - long-lasting cleaning

The Deerma DEM-VX900W is equipped with a lithium-ion battery with a capacity of 4000 mAh, which allows for up to 40 minutes of continuous operation. Such operating time is enough to thoroughly clean an area of up to 200 m². This allows you to clean efficiently without having to stop frequently to charge the device.

Included

- vacuum cleaner
- vacuum cleaner tube
- power cord
- charging station
- water refill station
- cleaning brush
- cleaning brush holder
- instruction manual
