Darkflash Gauss G24 3-in-1 computer fans (white)

The Darkflash Gauss G24 fan is an excellent choice for those who want to keep their computer efficiently cooled, while appreciating a stylish design. It provides impressive airflow (52.96 CFM) while reducing noise, so it maintains optimal temperature without generating loud, annoying noise. It is also distinguished by addressable ARGB backlighting for fantastic visual effects. The kit includes 3 fans, which can be connected using built-in magnets.

High performance

The Gauss G24 fan allows precise speed adjustment from 800 to 2000 RPM. As a result, it can provide cooling that is optimally matched to system load and temperature changes. Play dynamic games or use demanding software without worry - with Darkflash you don't have to worry about your

computer overheating!

Quiet operation

Thanks to the special design of nine aerodynamic blades, the fan ensures quiet operation even at high speeds. Its maximum noise level is only 33.55 dB - forget about annoying loud noise and enjoy quiet work or gaming!

It will serve you for a long time

The fan is equipped with a durable hydraulic bearing, which increases its durability, ensures low friction and reduces noise levels. Thanks to this, the service life of the device reaches up to 40,000 hours - an excellent choice for years!

Easy connection thanks to built-in magnets

The included fans are equipped with practical magnets, so you can connect them conveniently. This will allow you to better organize the space inside the case and keep the wiring in order. Such a solution improves the aesthetics and improves the airflow in the computer! Note: due to the power limitations of the ARGB interface, it is recommended to combine a maximum of four fans.

ARGB backlighting

The fan supports addressable ARGB backlighting, allowing you to fully personalize the look of your computer. Combine it with a transparent case, for example, and create a configuration that will impress you not only with its performance, but also with its unique design! The Gauss G24 is compatible with a number of RGB systems, such as ASUS Aura Sync, MSI Mystic Light Sync, Gigabyte RGB Fusion 2.0 and ASRock Polychrome RGB.
