

## Shelly BLU TRV Thermostatic head (Set with Control unit)

Modelis: TRVBLU1-pack

Gamintojas: SHELLY

EAN: 3800235264980

Prekės kodas: 21777

# 66.99€

### Shelly BLU TRV thermostatic head (set with control panel)

Shelly BLU TRV is a smart thermostatic head that provides full control over the temperature in your home. With precise control and integration with smart home systems, it allows you to adjust room conditions to your preferences. It also supports Bluetooth and Wi-Fi (in conjunction with the included control panel), and additionally allows you to remotely manage your heating via an app. An additional advantage of the device is the Boost mode, which facilitates rapid heating of interiors.

### Precise temperature control

One of the most important advantages of the Shelly BLU TRV is the precision in temperature control - you can adjust the temperature with an accuracy of  $\pm 0.1^{\circ}\text{C}$ . Thanks to this, you will easily take care of the optimal conditions in the room and ensure your dream comfort!

## **Boost mode - fast heating**

Need to quickly raise the temperature in the room? Boost mode comes to the rescue! It allows you to fully open the valve, allowing you to heat up the space in a very short time. Such a solution is great, for example, in situations when you come home to a cold house and want to warm up as quickly as possible. Boost mode can be activated locally, using the rotary knob on the head, or remotely, via the app.

## **Smart scheduling and energy savings**

The Shelly BLU TRV head offers the option to set individual schedules that allow you to match its operation to your daily rhythm. This allows you to enjoy a warm and cozy home whenever you need it, while avoiding unnecessary heater operation. Intelligent heating management allows you to reduce energy consumption and lower your bills!

## **Support for external sensors**

Shelly BLU TRV works with temperature or door/window sensors (on separate sale), which further increase the precision of indoor heat management. This allows you to adjust the heating even better to the actual conditions in your home. The head will automatically adjust to them, providing optimal comfort without your intervention!

## **Long operating time, simple operation**

To power the device, you only need two AA batteries (included in the set), which provide an operating time of up to 2 years. You don't have to replace them too often! What's more, a dial with a display allows convenient operation of the head. Installation of the included control panel is also very simple - just connect it to any USB power source, for example, to a regular mains charger.

## **Control with a smartphone**

The head works with the dedicated Shelly app, which allows you to conveniently monitor energy consumption and adjust settings. The BLU TRV model is also compatible with most popular smart home systems. So you can manage your heating using the same platform you use every day to
