Darkflash DY451L fanless computer case (white)

Darkflash DY451L is a spacious ATX computer case, designed for users who expect high quality, high expandability and elegant design. This modern model is perfect for advanced gaming configurations, providing space for high-performance components and an effective cooling system. Note: for full functioning of the display it is necessary [download the driver from the manufacturer's website](#).

Spaciousness and expandability

The DY451L chassis features a spacious and transparent interior that allows easy installation and upgrade of components. Thanks to its dimensions, it will accommodate not only standard ATX motherboards, but also smaller Micro ATX and ITX formats. It has nine expansion slots, providing

flexibility for components such as graphics cards up to 420mm in length.

Comprehensive dust protection

The case is equipped with full-length dust filters to protect components from debris, which significantly extends their life. The bottom filter can be easily detached for convenient cleaning and keeping the case interior clean.

Support for advanced cooling

The DY451L offers extensive cooling system installation options. Users can install radiators with a maximum size of 360mm on the top and 480mm on the side, allowing even the most powerful components to be cooled effectively. The case also supports fans of different sizes, giving you full control over the airflow inside your computer.

High quality workmanship

The Darkflash DY451L is made of 0.8 mm thick steel sheet, which ensures the robustness of the construction. The tempered glass side panel allows you to admire the computer's interior and emphasizes the aesthetics of the illuminated components.
