also advanced options, including, for example, overcharging and overheating protection. With integrated temperature sensors and overcharge protection features, the Shelly Dimmer 2 provides a high level of safety and reliability. What's more, the equipment enables monitoring of lighting energy consumption, which contributes to better energy management and potential savings.

Smart control and automation

The controller allows both local and remote control of lighting, giving users full control over home lighting from anywhere. In addition, with features such as weekly scheduling and automatic adjustment of lighting to sunrise and sunset, the Shelly Dimmer 2 offers advanced automation capabilities that can be easily customized to individual preferences.

Easy integration with home automation systems

Compatibility with Android, iOS, and integration with voice assistants such as Amazon Alexa and Google Assistant, makes the Shelly Dimmer 2 easy to use and a perfect fit in the smart home ecosystem. In addition, the ability to work with home automation servers via MQTT, CoAP and REST APIs allows for advanced integration and use in DIY projects, including Arduino projects.
