

Geneinno T1 150m 4K UHD underwater drone

Modelis: T1-150M

Gamintojas: GENEINNO

EAN: 6972016030033

Prekės kodas: 21906

2,510.99€

Geneinno T1 150m 4K UHD underwater drone

The Geneinno T1 underwater drone is a unique combination of advanced technology, impressive image quality and uncomplicated operation. It is the perfect tool for underwater adventure enthusiasts, professional divers, researchers and filmmakers. Discover the world beneath the surface of the water from a new perspective - whether you want to capture the beauty of the ocean, find the perfect spot for fishing, or conduct a precise inspection of underwater installations. With the Geneinno T1, boundaries don't exist - start your underwater adventure today!

Dive deeper than ever

Geneinno T1 stands out from other underwater drones thanks to its impressive diving range of up to 150 meters. That's deeper than any other drone available on the market! With its robust

construction and high pressure resistance, the device can handle even the most demanding underwater conditions. Whether you're exploring shipwrecks, observing marine life or conducting technical inspections, the Geneinno T1 is a reliable partner for any underwater adventure!

Unparalleled image quality

Observe the underwater world with incredible attention to detail thanks to the built-in 4K UHD camera with a 160° ultra-wide angle lens. The drone allows you to record videos in 4K quality at 30 frames per second and take photos in 8 MP resolution. As a result, every underwater journey will be captured in vivid colors and sharp details. Want to watch your discoveries in real time? The 1080P real-time streaming feature allows you to view live video without delay, directly on your smartphone or tablet.

Perfect videos in all conditions

Under water, colors often appear faded, but the Geneinno T1 eliminates this problem with a set of color correction filters. Red and purple filters provide realistic color reproduction at depths of 5 to 21 meters, in both fresh and salt water. What's more, two powerful LED floodlights with a combined output of 3,000 lumens illuminate even the darkest corners of the ocean, allowing exploration regardless of the time of day.

Unparalleled mobility thanks to powerful engines

The Geneinno T1 is equipped with six powerful motors that provide exceptional agility, power and stability during diving. Thanks to a precise control algorithm, the drone can handle even strong currents, maintaining full control over movement. Whether you're swimming forward, sideways, up or down, the T1 follows exactly where you want it to.

Intuitive controls and new perspectives

Controlling the drone is extremely easy and intuitive thanks to a dedicated controller that connects to mobile devices via a 2.4 GHz frequency. The Geneinno App gives you full control over the drone's route, and you can capture scenes from unique perspectives with the new high and low angle shots feature (up to 60°). From now on, no detail will escape your attention, and you can share

extraordinary images of the underwater world with your loved ones!

Up to 4 hours of operation on a single charge

Geneinno T1 drone is not only power and precision, but also exceptional energy efficiency. Lithium-polymer batteries provide up to 4 hours of operation on a single charge, and it takes just 2 hours to fully charge. That's enough time to carry out complex explorations or filming sessions without rushing.

Practical design and easy transport

The Titan T1 was designed with user convenience in mind. The compact design, which resembles a carrying case on wheels, makes the drone easy to take anywhere. Whether you plan to dive in the lake, sea or ocean, carrying your equipment has never been easier!

Included

- Titan underwater drone
- wireless transmitter
- cable
- charger
- balancing weight
- Bluetooth mount
- filter
- user manual

Manufacturer	Geneinno
Model	Titan T1
Dimensions	390 × 347 × 165 mm
Weight	4.4 kg
Maximum diving depth	150 m

Drive configuration	6 motors (2 horizontal, 4 vertical)
Maximum speed	4 m/s (4 knots, in still water)
Operating temperature range	-10°C to 50°C
Field of view	160°
Image size	8 MP (3840 × 2160, 16:9 aspect ratio)
Video resolution	4K (3840 × 2160) 30 fps
ISO range	100-6400
Aperture	f/2.5
Exposure time	1/30 s
Memory	32 GB
Lens size	1/2.3"
Matrix	SONY CMOS 1/2.3"
Focusing	Fixed focus, FF
Live video transmission	1080P 30 fps / 720P 30 fps
Light beam angle	110°
Color temperature	7000K
Luminous flux	1500 lm × 2
Battery capacity	97.2 Wh (10.8V / 9000 mAh)
Charging time	2 hours
Operating time	Up to 4 hours (under normal use)
ROV charger input	100-240V AC
ROV charger output	12.6V DC
Accessory expansion port	8-pin I/O port
Power supply	5V / 12V DC
Wireless range	50 m
Cable diameter	4.2 mm
Cable length	150 m
Working strength of cable	100 kgf
Cable breaking strength	300 kgf
Communication frequency	2.4 GHz
