

EUREKA E10s cleaning robot

Modelis: E10s

Gamintojas: EUREKA

EAN: 840296501016

Prekės kodas: 21913

230.99€

EUREKA E10s cleaning robot

The Eureka E10s is an advanced cleaning robot with vacuuming and mopping functions that automatically empties the dust container in the self-emptying base. With its precise LiDAR navigation, 4000 Pa suction power and intelligent carpet detection function, the E10s provides comprehensive and maintenance-free cleaning even in large homes. It is perfect for homes with children, pets and anywhere cleanliness is critical.

45 days without manual emptying

With its advanced self-emptying base, the Eureka E10s can store dirt in the two-liter dust container for as long as 45 days, eliminating the need for frequent emptying. The bagless multi-cyclone system effectively separates dust and large debris, while the 5-layer HEPA filter captures even the finest dust particles and allergens, improving the air quality in your home.

Outstanding suction power and intelligent mopping

The E10s robot offers an exceptional suction power of 4,000 Pa to thoroughly remove dirt, dust and dander from hard floors and carpets. The four-stage suction power adjustment allows you to adapt the device's performance to different surfaces. The mopping function has been enhanced to automatically raise the mop by 10 mm when carpet is detected, preventing it from getting wet and ensuring safe cleaning of even mixed surfaces.

Precise LiDAR navigation and multi-floor mapping

The Eureka E10s uses advanced LiDAR technology to quickly create precise maps of your home and efficiently plan your cleaning route. The robot can memorize up to 4 different maps, making it ideal for multi-story homes. In addition, thanks to the function of setting virtual walls and prohibition zones in the app, you can precisely control which areas to skip during cleaning.

Powerful battery and long runtime

The E10s cleaning robot is equipped with a 5200 mAh battery, which provides up to 180 minutes of continuous operation on a single charge. This is enough to thoroughly clean an area of up to 300 m², making it ideal for large homes. When cleaning is complete or the battery is low, the device automatically returns to the docking station to recharge.

Intelligent carpet detection and automatic power increase

The E10s robot automatically recognizes carpet surfaces with ultrasonic carpet detection technology. When it detects the carpet, it automatically increases the suction power to deep clean the fibers and effectively remove dirt. After leaving the carpet, the robot returns to standard suction power, saving energy and extending its working time.

Control via app and voice control

With the dedicated Eureka app, you can precisely manage the E10s robot. Set cleaning schedules, select zones to clean or bypass, and adjust suction power and water flow levels. The robot is also compatible with Amazon Alexa and Google Home for convenient voice control - just one command to start cleaning.

Ideal for pet owners

The E10s is an excellent choice for those with pets. With high suction power and a dust separation system, the robot effectively removes dander and allergens from floors and carpets. The automatic mop lift function and thorough vacuuming minimize the risk of secondary surface contamination.

Quiet operation and overcoming obstacles

Despite its power, the E10s robot works extremely quietly - the noise level in silent mode is only 65 dB, making cleaning almost imperceptible. With the ability to overcome thresholds up to 20 mm high, the robot easily moves between rooms and copes with a variety of obstacles.

Compact design and easy maintenance

The E10s is distinguished by its compact dimensions (350 x 350 x 97 mm), which allows it to maneuver easily under furniture and in tight spaces. The self-emptying base is easy to use, and the dust container and filter can be easily removed and cleaned, making daily maintenance of the unit easy.

Included

- Self-emptying base
- Robot
- Side brushes * 2
- Mop
- Cleaning tool
- HEPA filter (installed)
- Main brush (installed)
- Dust container (installed)
- Water tank (installed)

Model E10s

Net weight 8.0 kg (robot + base station)

Robot

Product dimensions 350x350x97mm

Battery capacity 5,200mAh

Capacity of dust container 200ml

Water tank capacity 220 ml

Maximum suction 4,000Pa

Maximum operating time 180 minutes (in silent mode)

Lowest noise level 65dB(A)* (in silent mode)

Base station

Product dimensions 250x180x442.5 mm

Dust station capacity 2L

Pojemność akumulatora: 5200, Operating time (min): 180, Dust container capacity (l): 1.5, Suction power (Pa): 4000, Water container capacity (l): 0.22, GPSR Link: https://psr-assets.innpro.pl/small_appliances/sg_small_appliances_vacuum_cleaners.pdf, Gross weight: 10700, Net weight: 8000, Box length: 37,80, Box width: 32,80, Box height: 48,00, Information about data generation: <https://dataact.innpro.pl/eureka/840296501016>
