Aprašymas

The Cat5e Kit connects Logitech Tap up to 40 meters away from the meeting room computer using category cabling.

Unlike USB, Cat5e supplies both data and power over a single cable, and thus eliminates the need for a separate outlet at the table to run Tap.

Cat5e cabling can also be cut and crimped to exact lengths, doing away with cable coils for clutter-free deployments of Tap.

While 10 meters of cabling are included, any Cat5e or higher cabling can be used for runs of up to 40 meters. Additionally, the Cat5e Kit is compatible with a Logitech Tap Table Mount, Riser Mount, and Wall Mount, enabling convenient operation of Tap with smart cable routing.

In all, the Cat5e Kit allows for the placement of Logitech Tap nearly anywhere while maintaining a clean meeting room appearance.
