Darkflash DY470 computer case (black) + 4 fans + GPU bracket

The Darkflash DY470 case will allow you to build a computer that will surprise you with its performance and stylish, modern design. Its transparent panels allow you to expose the components of your choice, and support for ATX, Micro ATX and ITX motherboards, various types of graphics cards and other components means that everyone can create a configuration perfectly suited to their needs. The set includes four reliable fans, taking care of optimal performance, and a GPU bracket to protect the graphics card.

Four fans for better performance

Adequate cooling of your computer is essential, which is why the Darkflash DY470 kit comes with 4 reliable DM12 Pro fans (3 on the side, 1 on the back). The fans reach speeds of up to 1600 RPM, and

offer up to 20 different ARGB lighting effects. Their operation is extremely quiet (27.5 dB), so you won't disturb your household members, even during the most intense computer games. The fans feature 4Pin PWM and 5V3Pin A-RGB connectors, and are also compatible with ASUS AURA SYNC (5V), which means they automatically adjust their operation according to the temperature of your computer.

Various expansion options

The DY470 offers an extremely spacious interior, allowing for easy expansion and installation of the components of your choice. It allows you to install a graphics card of up to 410 mm (horizontally) or up to 390 mm (vertically, with an optional PCIe4.0 cable), as well as a CPU cooler of up to 175 mm in height and a power supply of up to 200 mm. You can also accommodate two HDDs or one SSD, so you can easily provide space for your photos, videos, games or documents.

Reliable cooling

The case provides extensive cooling capabilities, making it perfect for even the most demanding configurations. It allows the installation of up to 10 120 mm fans, so you can easily ensure effective air circulation and adequate temperature inside. However, that's not all. DY470 allows the installation of two 360 mm water coolers, which guarantees efficient, stable operation of the computer even under heavy load.

Support for ATX motherboards with back-connect system

The Darkflash DY470 case is compatible with ATX motherboards with a back-connect system that allows most cables to be hidden. This space organization ensures a neat interior look, and also makes cable management easier. Forget about unsightly cables visible by the front panel!

Full protection of components

The case is equipped with full dust protection. This makes it easy to keep it in perfect condition - don't worry about it getting dirty quickly! What's more, the removable system prevents dirt accumulation and is very easy to clean. The GPU holder is also included, which takes care of the maximum safety of your graphics card. Together with it, you will avoid the risk of bending the card,

as well as improve the stability of its installation, protect it from mechanical damage and increase the aesthetics of the case interior. All this use affects the stability of operation and longevity of components.

Ports you need

On the front of the case you will find numerous connectors that will facilitate your daily work with the computer. You'll have a microphone input, a headphone jack, two USB 3.0 ports and one USB-C 3.2 port for fast charging and file transfer. So you can conveniently use your peripherals of choice!

Included

- Darkflash DY470 enclosure
- DM12 Pro ARGB x4 fan
- GPU holder
- user manual
