SwitchBot Hub Mini Matter Enabled Smart Switchboard

SwitchBot Hub Mini supports Matter, a universal smart home standard that makes devices from different manufacturers communicate seamlessly. With the hub, you can integrate your older remote-controlled devices (e.g., air conditioner, lights, TV) and Bluetooth SwitchBot devices into your Apple Home, and then control them with your iPhone or voice commands from your HomePod. This is ideal for people who want a smart home without replacing all their equipment.

One hub, many possibilities

Instead of dozens of apps and remotes - one app. Hub Mini allows you to add infrared devices and Bluetooth hardware from SwitchBot, such as Bot, Lock and Curtain, to your Apple Home system. With

Smart Learning, it only takes a moment for the hub to learn to control your air conditioning, lights or TV. And you have full control over it from your phone, from anywhere.

Customized scenes

Automation with Hub Mini is not just a gadget - it's a real convenience. Set scenarios that respond to sensors - for example: you leave the house, and a sensor detects you leaving, so your cleaning robot starts cleaning, and the air conditioner and TV automatically turn off. Everything works by itself, so you don't have to remember to turn off the equipment.

Control by voice and save energy

Integrate Hub Mini with Siri, Alexa, Google Assistant or IFTTT - and enjoy voice control. Just say "turn off the air conditioner" and you're done. With the SwitchBot app, you can also check what's running at home and turn it off remotely - right from work, bed or vacation. That's convenience, but it also saves energy and lower bills.

Manufacturer	SwitchBo
Manufacturer code	W0202203
Matter compatibility	Yes (requires external hub, e.g. Apple HomePod Mini, Google Nest Hub)
Supported protocols	Wi-Fi 2.4 GHz, Bluetooth, IR
Supported IR devices	Air conditioners, TVs, lighting (functions: on/off, mode, temperature - depending on the device)
