OBSBOT Tail 2 webcam

The OBSBOT Tail 2 is a groundbreaking device that is redefining the standards for video content creation. Equipped with the world's first three-axis PTZR at 4K resolution, this compact camera offers exceptional image quality, intelligent AI tracking, seamless switching to vertical format without loss of quality, and professional features. As a result, the Tail 2 provides filmmakers with complete freedom of action, precision and top-notch results - whether they're shooting a live broadcast, feature film or educational content.

Pristine image quality

The Tail 2 was created for demanding filmmakers who expect perfect image quality. Using a 1/1.5" CMOS sensor and 12-element optics, the camera captures stunning footage at 4K/60fps and 1080p/120fps. The 5x optical zoom and 12x hybrid zoom function allows you to capture every detail - whether in dynamic movie scenes, broadcasts or educational activities. All-Pixel PDAF support and advanced AI-ISP combined with a large pixel size (2µm) guarantee excellent quality even in low light.

Support for HDR and Dual Native ISO ensures color depth and wide dynamic range, regardless of lighting conditions. With the Tali 2, you can record amazing videos with extraordinary effects that will amaze you and your viewers.

Smoothness and stability in every shot

The OBSBOT Tail 2 camera is the first in the world to introduce a three-axis PTZR design in a 4K camera, offering unprecedented smoothness of motion and lossless vertical recording. Vertical 4K/60fps recording allows you to create content ideal for social media without cropping or loss of quality. An auto leveling system takes care of keeping the horizon straight even with dynamic movements or unusual mounting settings, while advanced R-axis stabilization and ultra-fast PTZ movement eliminate shake, ensuring cinematic-quality recordings with $\pm 0.003^\circ$ precision. By choosing Tali 2, you will open up uncharted horizons, creating breathtaking shots.

Perfect tracking and dynamic adaptation

The hallmark of Tail 2 is its enhanced AI Tracking 2.0 technology, which uses advanced "deep learning" algorithms. New tracking modes enable perfect tracking of one ("Only Me" mode) or multiple people, which works well in broadcasts, presentations or on stage. The camera recognizes more than 30 animal species and 200 objects, enabling creative framing even in dynamic situations. The AI Auto function adjusts framing on the fly, offering an impressive zoom range of 3x to 24x, while adjustable tracking speed and independent axis motion control allow you to fully customize the settings to the nature of the scene you're recording.

Ready for any challenge

Designed with professionals in mind, the Tail 2 offers a wide range of transmission protocols (NDI, RTMP, RTSP, 3G-SDI, Pelco-D, Pelco-P and FreeD), enabling easy deployment for AR/VR production, live broadcasting and extended multicam systems. The camera offers full-size HDMI 2.0, USB 3.0, Ethernet, RS-232 and Wi-Fi 6 support, which translates into fast data transfer and seamless integration in advanced broadcast environments. What's more, full compatibility with OBSBOT applications (e.g., Start, Live, Center, Talent) allows for quick configurations, multi-camera management and end-to-end implementation at the highest level. Tali 2 is a camera that not only impresses with its recording quality and many features, but also guarantees comfortable and skillful

operation.

Lightweight, rugged and portable - made for creatives

Despite its advanced features, the Tail 2 remains extremely compact - it weighs about 1 kg. Its slim design is perfect for solo filmmakers as well as professionals working on extended camera systems. The built-in battery with an impressive 5000 mAh capacity provides up to 5 hours of uninterrupted recording, making it ideal for outdoor projects or long events (such as concerts, matches, etc.). In addition, the dual-color tally light (recording status indicator) and built-in ¼" thread allow the camera to be securely attached and easily coordinate multiple devices in real time.

Intuitive gesture operation

OBSBOT Tail 2 introduces innovative features to enhance the creative experience. The Composition Line function allows you to dynamically change the position of a tracked subject or person, perfectly matching the framing to the intended artistic vision. Enhanced gesture support enables touchless control - from tracking activation to zooming to starting recording, all achieved with a simple hand movement. In addition, AI-Powered Face Framing dynamically adjusts the frame to the position of your face, providing natural and engaging shots ideal for interviews, podcasts and interactive content.

Included

- webcam
- USB-C 3.0 cable
- USB-C to USB-A 3.0 adapter
- USB-C power cable
- serial cable 2.5mm male to RS232 MD8 female ×2
- user manual

Sensor/matrix	1/1.5" CMOS
Lens	12-element optical system
Video resolution	4K at 60 fps, 1080p at 120 fps
Zoom	5× optical zoom, 12× hybrid zoom
Focusing system	All-Pixel PDAF
Low-light performance	AI-ISP, 2 μm pixel size
Supported image technologies	HDR, Dual Native ISO
PTZR system (Pan, Tilt, Zoom, Roll)	3-axis PTZR stabilization, 90° rotation, R-axis stabilization (±0.003° precision), auto leveling system, vertical recording in 4K
AI Tracking 2.0	"Only Me" mode and group tracking, recognition of more than 30 animal species and 200+ objects
AI Auto function	Intelligent frame adjustment, 5 levels of tracking speed and independent axis adjustment
Connectivity and protocols	HDMI 2.0 (full size), USB 3.0, Ethernet, RS-232, Wi-Fi 6
Support for protocols	NDI, RTMP, RTSP, 3G-SDI, Pelco-D, Pelco-P, FreeD
Compatibility with applications	Obsbot Start, Obsbot Live, Obsbot Center, Obsbot Talent
Additional features	Composition Line (frame adjustment), enhanced gesture control (tracking activation, zoom, recording), AI-Powered Face Framing (dynamic face framing)
Battery capacity	5000 mAh
Operating time	Up to 5 hours
Weight	1.066 kg

Built-in microphone: Nie, GPSR Link: https://psr-assets.innpro.pl/it_accessories/sg_it_accessories_webcams.pdf, Gross weight: 2370, Net weight: 2200, Box length: 20,50, Box width: 19,00, Box height: 28,00, Information about data generation: <https://dataact.innpro.pl/obsbot/6971889230663>
