### Smart ceiling lamp with edge lighting Yeelight Mars C400

Yeelight Mars C400 is a smart ceiling lamp that will make the lighting in your home adapt to any situation. It combines bright white light with striking RGB (red, green, blue) edge illumination, and offers 16 lighting modes and 16 million colors to create the perfect mood. With compatibility with various voice assistants, you can control it remotely with voice commands and apps, as well as with a remote control or SLISAON® switch (available for sale separately). Adjustable color temperature and smooth brightness settings will allow you to tailor the lighting to your individual preferences. The lamp is safe for your eyes, while offering energy-efficient operation at 30 watts. Opt for smart solutions and choose Yeelight Mars C400 today!

### Light tailored to you

The Mars C400 offers a color temperature range of 2700K to 6500K and infinitely adjustable brightness from 0-100%, allowing you to create the perfect environment for both work and relaxation. The front white light and RGB side light can operate independently, providing a wider spread of light and exceptional depth of effect. The lamp brings a unique atmosphere to your home, offering up to 16 million colors and 16 preset scene modes to suit any moment.

## Full integration with smart home

The lamp works with the most popular smart home platforms, including Google Home, SmartThings, Amazon Alexa, Xiaomi Home, as well as Yandex. Voice control, remote control via an app, or integration with IoT platforms (Internet of Things, a system that allows various electronic devices to send and receive data - to and from other things and systems) make managing lighting simple and convenient. The lamp is also compatible with a remote control and SLISAON® switch (sold separately).

## Comfort and safety for your eyes

The device was developed with your health in mind - a high color rendering index of Ra 90 faithfully reproduces colors, while RG0 Blue Light Safety (Risk Group 0, stands for the lowest photobiological risk class for blue light) and flicker-free certification according to IEEE standards (Institute of Electrical and Electronics Engineers - an organization of engineers and scientists who create and approve hardware standards) guarantee safe, eye-pleasing light. A special Moonlight mode emits a soft glow, perfect for nighttime.

## The perfect atmosphere for any occasion

Whether you're watching a movie, playing a game or cheering on your favorite team, the Yeelight Mars C400 will ensure complete immersion in the event with its atmospheric side illumination. With 30 watts of power, the lamp will effectively illuminate the space while allowing you to enjoy economical energy consumption.
