Maono PD300X microphone

The Maono PD300X is a dynamic microphone designed for streamers, creators and gamers who want studio quality with ease of use. It offers dual USB-C and XLR outputs, allowing you to switch freely between your computer, audio interface and smartphone. With 192 kHz / 24 bit sampling, the unit captures sound at the highest resolution - as much as 5 times better than standard CD quality. A broadcast-grade dynamic capsule and built-in DACs guarantee natural sound and deep, clear tone. A metal chassis adds to the robustness of the design, and the whole is complemented by dedicated Maono Link software, which allows you to control the sound on the fly.

Two ports and lag-free monitoring

The Maono PD300X microphone features a USB-C and XLR port for flexibility in configuration - the device works seamlessly with both computers and professional equipment. In addition, a 3.5mm headphone output with 0-delay monitoring allows you to control your voice live without audio shifts.

5-layer noise protection

The 5-layer noise cancellation system effectively reduces the impact of ambient sounds. Side-noise isolation, foam flocked filter, EMI shielding, metal anti-shock mount and Maono Link software noise gate all work together to provide a clear and crisp signal. The software achieves noise reduction of up to 30 dB, minimizing as much as 99% of constant sounds such as keyboard clicks, mouse clicks and air conditioning noise.

Full control with Maono Link

Maono Link software allows precise control of microphone settings in real time. Features such as parametric EQ, compression, limiter, monitoring mixing, and microphone and headphone volume control are available. You can also choose from 4 modes - Podcast, Gaming, Recording and Streaming. With these, you can tailor the microphone's performance to your specific application with just one click. The 3-in-1 dial and mute button further simplify operation without having to reach for the computer.

Convenience of use and versatility of applications

The body of the microphone is made of metal, which increases its resistance to damage. The built-in anti-shock mount suppresses desk vibrations from 5 to 50 Hz, and the flocked wind shield effectively eliminates explosive voices, ensuring the clarity of the recording. The Maono PD300X will adapt to your needs and allow you to focus solely on your content, whether you're working on a podcast, recording singing, playing online games or hosting a live broadcast.

Included:

- Microphone
- 5/8" to 3/8" adapter
- 2-in-1 USB-A and USB-C to USB-C cable
- User manual
