68.99€

Meross MSP844(EU) smart fast charging power strip, 4 outlets + 2x USB-A + 2x USB-C (Matter)

Meross MSP844(EU) is an advanced power strip with four outlets and four USB ports (2x USB-A, 2x USB-C), which combines the functions of charger, extender and intelligent power management. With support for the Matter standard, it integrates seamlessly into popular smart home ecosystems. Independent control of the outlets and USB group, fast charging and extensive security features make it the perfect solution for any modern home.

Remote control from anywhere

Using the Meross app, you can individually manage each of the four outlets and the USB port group - from anywhere, anytime. All you need is internet access to remotely turn on or off your connected devices, whether you're at work, on vacation or in the next room.

Smart charging with maximum power

The Meross MSP844 provides fast and smart charging - the single USB-C port supports the 30 W PD standard, while USB-A supports QC 3.0 technology with up to 18 W of power. So you can charge your phone, tablet, laptop or other device in no time! What's more, if you're charging more devices at the same time, the strip intelligently distributes power to ensure optimal performance.

One device, many functions

The strip combines four classic power outlets and four USB ports, eliminating the need for multiple chargers and extension cords. It's a convenient and aesthetically pleasing solution that will help you organize your desk or bedside space.

Full protection and compliance

A heat-resistant case up to 750°C, overload protection and a durable cord ensure safe use. The product also meets CE and TUV certifications, and all components have been tested for durability and reliability.

Multi-platform support and strong security features

Standard Matter guarantees security with encrypted communications and a local architecture - no need to transfer data to the cloud. It also ensures compatibility with most popular smart home ecosystems. It also allows for quick and easy configuration - just scan the code and you're done.

Note: a compatible hub, such as HomePod mini, Echo Dot, Google Nest Hub or SmartThings, is required for the device to function properly.

Universal compatibility
