COOLING

IP5X Dust Resistance

Keep it clean

Dust is enemy number one for fans. It's easy to clean the blades, but taking the fan apart to remove dust that has made its way inside is not a simple task. Passing the IP5X certification means the housing is safe from nasty particulates, so you'll never need that deep clean.

2-slot Design

Sink your heat into this

A carefully designed shroud, heatsink, and heatpipe layout allows the two fans to leverage chassis side-panel ventilation and deliver thermal performance that belies the card's size.
