Deerma DEM-T10W cordless vacuum cleaner

Deerma DEM-T10W is a cordless vacuum cleaner designed for daily cleaning of larger and smaller areas. What's more, it allows for convenient maneuverability thanks to its lightweight design and swivel handle. Equipped with a powerful motor and an effective filtration system, it makes it easy to remove fine dust, hair and dander, which also makes it good for homes with pets.

120,000 RPM motor - fast and efficient vacuuming

The vacuum cleaner uses a Deerma-developed motor that operates at 120,000 rpm. It generates high vacuum and high suction force, which translates into effective collection of dust and dirt from various surfaces. Thanks to its precision design (0.001 mm), the motor maintains high efficiency and durability.

Two modes of operation and suction power of 20 kPa

The vacuum cleaner offers 2 modes of operation: Standard for everyday cleaning and High-power for more thorough vacuuming. With 20 kPa suction force and 85 AW power, it allows you to collect fine dust, crumbs and hair from a variety of surfaces.

Long run time

The built-in 6x2200 mAh battery provides up to 45 minutes of use, allowing you to clean a house of up to 200 sq. ft. on a single charge. The vacuum cleaner is suitable for larger apartments and houses, allowing for thorough cleaning without frequent recharging.

Green brush illumination

The vacuum cleaner uses a green backlight with a wavelength of about 555 nm, which has a range of 66 mm and an angle of incidence of 120°. It increases the visibility of dust particles by up to 12 times, making it easier to see dirt when vacuuming under furniture or in poorly lit corners.

Special brush to prevent hair entanglement

The vacuum cleaner is equipped with a V-shaped brush with a 38.5° pulsating comb function and a system of 38 0.9mm teeth that direct hair to the center of the nozzle and prevent hair entanglement. This makes the device practical for homes with pets.

Convenient vacuuming under furniture

Make vacuuming the space under furniture easy. The 48 mm thick brush and 96 mm high vacuum cleaner body allow you to vacuum under couches and beds without moving them, making it easy to clean hard-to-reach areas. What's more, the brush is equipped with a motor running at 7500 rpm for even more convenient operation.

6-stage filtration system

The DEM-T10W uses a 6-stage filtration system that effectively separates dust from the air reducing the risk of secondary contamination. The process begins with a cyclone pre-filter that separates

larger dirt particles, followed by a mesh filter that traps larger dust particles. The cyclone separator further separates smaller particles, and the cotton filter captures fine dust. Next, the HEPA H13 filter, which captures microscopic dust particles and allergens, improves the air quality in the room. The whole is completed by a sponge at the air outlet, which reduces noise and protects against the re-release of pollutants.

Comfort of use

The ergonomic handle, which rotates 180°, adapts to the natural movements of the hand, making it easy to vacuum under furniture and in hard-to-reach places without putting undue strain on the wrists. In addition, the vacuum cleaner weighs only 1.1 kg, which allows you to comfortably clean even high places. In turn, the applied vibration and noise reduction technology increases the comfort of use during work. The DEM-T10W can be conveniently stored in an upright handle, which protects it from falling and keeps it tidy, and the narrow brush allows you to get rid of dirt from hard-to-reach places.

Included

- vacuum cleaner body
- tube
- floor brush
- long brush for hard-to-reach places
- wide flat brush
- power supply
- handle
- screws x2
- instruction manual
